

Is glonasssoft.ru legit? TrustSniffer's high-trust assessment: 100/100

glonasssoft.ru

Verdict

100

OUT OF 100

HIGH TRUST

glonasssoft.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for ГЛОНАССSoft offering satellite vehicle monitoring solutions, hardware sales, cloud telematics subscription, mobile apps, partner program and support. Contact details and legal entity are provided.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a corporate platform for ГЛОНАССSoft, presenting satellite-based vehicle-monitoring services, telematics equipment, cloud software, mobile applications, customer support, and related commercial offerings. Its apparent business model is business-to-business sales of monitoring hardware combined with recurring software services and partner integrations for transport operators.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate product narrative rather than a phishing or impersonation pattern, and the observed site behavior did not show credential-harvesting forms, wallet-connect activity, cloaking, or suspicious script activity. The homepage advertises fuel savings of up to 50% and an equipment payback period of two to twelve months; these are commercial performance claims that should not be treated as guaranteed outcomes, but they are not, by themselves, indicators of impersonation. External reputation checks recorded no malicious or suspicious detections, and no brand-impersonation signal was identified.

EVIDENCE

- The homepage describes GPS/GLONASS vehicle monitoring, fuel control, route monitoring, speed control, equipment, support, and a free test-drive offer without identified fraud indicators.
- The homepage and observed interaction flows contained no login form, hidden sensitive form, external password destination, wallet connection, or clipboard-hijacking behavior.
- External reputation assessment recorded zero malicious detections, zero suspicious detections, and no confirmed threat-list finding.
- Domain registration records show registration on 2007-10-14, with an age of 18.84 years.

Regulatory Verification Notes

The contact and legal-information pages provide contact details and identify a legal entity, which is consistent with an operating corporate service. The stated commercial model includes hardware sales through an internet shop, recurring monthly cloud or telematics-server subscriptions, and partner or integration programmes. No regulated license claim or license number is identified in the supplied page analysis; this is a verification and disclosure point rather than evidence of a scam. The available evidence is therefore consistent with an established, apparently legitimate website, while the real-world operator identity and any sector-specific

authorization remain independently unverified. A contextual broker-intelligence check returned no match and should not be interpreted as a licensing determination.

EVIDENCE

- The contact and legal-information pages provide contact details and a legal-entity reference.
- Registration is through RU-CENTER-RU; the site is hosted on AS198610, BEGET-AS - Beget LLC, RU.
- The site's TLS certificate is issued by YE1, uses domain validation (DV), and is valid through 2026-10-03.
- The site has an established global traffic footprint, with a recorded rank of 29621 and inclusion within the top 1 million sites.

What to Verify Next

Before credential or payment interactions, an independent corporate-registry comparison should confirm that the legal entity shown on the site corresponds to the contracting party and payment recipient. Where the service or transaction is subject to sector-specific requirements, the applicable registry should be checked for authorization. The shop's terms, returns process, subscription cancellation conditions, and payment-protection arrangements should also be reviewed, and official contact channels should be confirmed through an independent route.

EVIDENCE

- The site's contact and legal-information pages provide the reference points for an independent corporate-identity comparison.
- The shop and subscription model create distinct terms, cancellation, refund, and payment-protection items for review.
- The presence of customer-support and partner-programme pages provides additional channels for confirming the intended commercial relationship.

Summary Verdict

The overall posture is high trust and low risk, with the available technical, reputational, and site-content signals converging on an established, apparently legitimate corporate website. This conclusion supports normal business engagement in principle, but it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves directly to a single likely origin address hosted by Beget LLC, with no detected CDN or WAF edge layer. This is a neutral infrastructure characteristic rather than an indication of maliciousness; the valid transport certificate provides encryption for connections, while the absence of a detected protective edge layer means there is less CDN-based mitigation against direct infrastructure exposure.

EVIDENCE

- Infrastructure resolution identified one unique IP address and one likely origin IP, with zero edge IPs.
- No CDN vendor or CDN deployment was detected.
- Hosting infrastructure is associated with AS198610, BEGET-AS - Beget LLC, RU.

Closing Assessment

Normal engagement may proceed subject to ordinary independent checks of the contracting entity, commercial terms, and payment protections before credentials or funds are exchanged.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of glonasssoft.ru.

- The request stayed on glonasssoft.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2026-10-14. NOTED
- It is hosted on BEGET-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about glonasssoft.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
