- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

GMEDIA is an Indonesian corporate internet and digital technology services provider operated by PT Media Sarana Data, presenting business and home connectivity, cloud computing, application development, managed services, system integration, and IT consulting for commercial, institutional, government, and residential users.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, reputation, and behavioral signals. The homepage presents a coherent corporate-service model, identifiable operator, customer references, physical locations, contact channels, and no phishing, credential-harvesting, deceptive financial, or high-pressure features. Historical coverage is consistent with the current corporate/IT-services identity.

- The homepage identifies GMEDIA as a digital service provider operated by PT Media Sarana Data and lists internet, cloud, application, managed-service, integration, and consulting offerings.
- The domain was registered on 2014-06-13 and is approximately 12.15 years old.
- The archive contains 167 snapshots across 2017–2026, with 10 years tracked.
- External reputation checks recorded zero malicious and zero suspicious detections, no blacklist hit, and zero abuse reports.

Regulatory Verification Notes

The site's legal and corporate pages provide an identifiable operating entity, terms, privacy documentation, locations, contact channels, and customer references. No regulatory license claim or license number is presented; this is a limited disclosure point requiring confirmation only if a proposed service depends on regulated authorization. The available third-party broker dataset contains no match, which is a contextual reputational signal rather than a licensing determination.

- The About, Terms, Privacy, and Contact pages identify PT Media Sarana Data and provide corporate-service and contact information.
- The site's hosting infrastructure is served from AS13335 (Cloudflare, Inc.).
- TLS is issued by WE1 at DV validation level and is valid to 2026-10-08.
- Page-authority evidence places the site in the mid authority band.

What to Verify Next

For enterprise procurement, confirm the contracting entity, service scope, pricing, and support channels through the site's published corporate contacts. Where a particular engagement involves regulated communications or technology services, confirm any applicable authorization with the relevant Indonesian registry before execution.

- The homepage and service pages describe subscription- and contract-based connectivity and technology services.
- The Terms and Privacy pages provide the site's stated contractual and data-handling framework.
- The Contact and client-reference content supplies channels for independent commercial confirmation.

Summary Verdict

GMEDIA presents as a legitimate, established, and trustworthy corporate technology provider. The convergence of coherent business content, durable domain history, clean reputation, identifiable corporate ownership, stable operation, and valid transport security supports normal interaction and standard account use.

Infrastructure Integrity

Cloudflare CDN and WAF protection place observed traffic behind AS13335 edge infrastructure, with four observed edge addresses and no origin candidate identified. This reduces direct origin exposure and is a mitigating security control, although it does not independently establish legitimacy.

Closing Assessment

Normal browsing, account login, and standard business interaction are appropriate; routine enterprise procurement and contractual controls remain suitable for material engagements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gmedia.id.

- The request stayed on gmedia.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-13. CLEAR
- The earliest public archive of this site is from 2017-04-29. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gmedia.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
