

Is gnsa.gov.gh legit? TrustSniffer's high-trust assessment: 80/100

gnsa.gov.gh

Verdict

80

OUT OF 100

HIGH TRUST

gnsa.gov.gh appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Official-looking National Service Authority (Ghana) site offering information on placements, scholarships, entrepreneurship support, FAQs, contact details and validation procedures. Contact phone numbers and postal address are listed. The captured HTML includes an injected/untrusted prompt block which is treated as a deception signal.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an official-looking Ghana National Service Authority public-service portal presenting national-service placements, scholarships, career and internship opportunities, entrepreneurship support, deployment sectors, validation procedures, and contact information; its apparent business model is government-funded administration and service information rather than direct user payments.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no confirmed phishing, impersonation, blacklist, or malicious-reputation signal. The homepage’s public-service content is coherent with its stated governmental purpose, and observed behavior showed no login form, hidden form, wallet connection, sensitive-form submission, clipboard activity, or suspicious external posting. A captured untrusted prompt block and the generic “NSA” page title are content-integrity anomalies; they do not, on the supplied evidence, establish that the site itself is deceptive or impersonating another entity.

EVIDENCE

- The homepage identifies services for national-service personnel, including placements, scholarships, employment opportunities, and entrepreneurship support.
- External reputation checks recorded 0 malicious and 0 suspicious results, with no malicious safe-browsing finding and 0 abuse reports; the site was ranked 92602 globally and remained within the top 1 million.
- The domain was registered in 2025 and is approximately 0.85 years old; the archive records 17 snapshots spanning 2025–2026, covering 2 tracked years.

Regulatory Verification Notes

The site presents itself as a Ghanaian government/public-service institution using the gov.gh namespace, and its pages provide agency information, service descriptions, contact details, and validation procedures. The real-world operator identity is not independently verified by the available evidence, so the on-page institutional presentation should be treated as apparent rather than conclusive proof of identity. No financial licence or licence number is claimed in the supplied content; given the stated public-administration model, this is a transparency and verification point rather than evidence of a scam. A registration record names RUTH DELA SEDDOH (DIRECTOR GENERAL), National Service Authority, and NITA GOV Registrar, but that record alone does not independently establish operational control.

EVIDENCE

- The homepage is categorized as Government / Public Service and states that the National Service Authority supports young graduates and national development.
- The registration record lists NITA GOV Registrar, creation date 2025-10-02T12:55:34Z, and expiration date 2026-10-02T12:55:34Z.
- The site's TLS certificate is issued by YE1 at DV validation level and is valid through 2026-10-29.

What to Verify Next

Before credential or payment interaction, an institution should independently confirm the agency and the relevant service instructions through an official Ghana government directory or an offline contact route, rather than relying solely on on-site identity claims. Any request for fees, personal documents, or account credentials should be matched to an independently confirmed government process, with payment-protection and dispute mechanisms reviewed where applicable. Official support and contact channels should also be confirmed through an independent route.

EVIDENCE

- The homepage provides telephone and postal contact details for follow-up.
- The captured site contains contact, chat, and signup forms, but no sensitive form or login form was observed.
- The site describes validation procedures and public-service applications, creating a clear basis for checking instructions against an independently confirmed agency process.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate government-service website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified, although the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with the observed address associated with Hetzner Online GmbH in Germany and the origin server not observable in this analysis. This protective architecture reduces direct exposure of the origin and is a mitigating security factor, but it is not proof of institutional legitimacy.

EVIDENCE

- Observed edge address: 65.109.242.162, served through AS24940, HETZNER-AS - Hetzner Online GmbH, DE.
- The infrastructure assessment identified 1 CDN edge IP and 0 likely origin IPs.

Closing Assessment

Normal informational use is proportionate to the available evidence; credential or payment actions should proceed only after the ordinary independent identity, process, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gnsa.gov.gh.

- The request stayed on gnsa.gov.gh. It was not redirected to another domain. CLEAR
- Registration is published under NITA GOV Registrar. CLEAR
- DNS for this domain is served by gov.gh, across 4 name servers. NOTED
- The registration is paid up to 2026-10-02. NOTED
- The earliest public archive of this site is from 2025-10-07. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gnsa.gov.gh at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
