Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Gocrypto is a multilingual cryptocurrency-trading education platform that presents interactive simulations and gamified practice as a way to learn market mechanics without exposure to real-world trading risk. Its apparent business model is educational software for novice and experienced learners, although the supplied About page does not establish how the service is monetized.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or adverse threat-intelligence findings were observed. The domain has maintained substantial archival continuity since registration, while the evaluated page contained no investment-return promises, requests for deposits or wallets, or sensitive-input forms. Observed browser behavior was similarly benign, with no cloaking, hidden forms, suspicious scripts, clipboard interference, wallet-drainer behavior, or untrusted external submissions.

- Domain-registration records show registration through GoDaddy.com, LLC in 2024 (~2.3 years old), with registration currently extending to 10 April 2027.
- The domain's archive contains 202 snapshots spanning 23 June 2024–21 July 2026 (3 years tracked), with no suspicious repurposing or semantic drift identified.
- The About page describes simulated, risk-free practice and contains no promises of returns, deposit requests, wallet requests, or credential-entry form.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, and an established global traffic rank of 41,597.

Regulatory Verification Notes

The supplied legal and identity content supports an educational-service characterization rather than a disclosed brokerage, exchange, or investment offering. No financial-services licence, licensing authority, or registration number is claimed on the evaluated page; this is a limited disclosure point, not evidence of misconduct, particularly because no real-money service was presented. The page identifies a multidisciplinary team in general terms but does not provide a legal-entity name, corporate address, or named management, while links to privacy and terms documents indicate a basic legal-document framework.

- The About page characterizes Gocrypto as a cryptocurrency-trading education and simulation platform and makes no claim of regulated status.
- The About page refers collectively to developers, financial experts, and educators without naming a contracting legal entity or individual principals.

- The site is served from AS13335 (Cloudflare, Inc., US).
- The site’s transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 14 October 2026.

What to Verify Next

Before purchasing any premium service, an institution should review the linked terms and privacy policy to identify the contracting entity, governing law, billing conditions, cancellation rights, and personal-data handling practices. Any future introduction of real-money execution, custody, individualized investment advice, or deposit-taking should trigger a fresh regulatory-scope review against the relevant official registry. Official support channels should also be confirmed independently before initiating material account or payment activity.

- The evaluated page exposes Privacy Policy and Terms of Use links, providing the appropriate starting point for contractual and data-governance review.
- A Contact Us route is presented in the page navigation, enabling confirmation of the service’s formal communication channel.
- A Log In route is visible, although the supplied About page itself contains no login or password form.
- The About page does not disclose pricing or another confirmed monetization mechanism, making billing terms relevant before any paid engagement.

Summary Verdict

The website presents as a legitimate, established, and trustworthy educational service. Its coherent purpose, continuous provenance, clean external reputation, substantive page content, and benign observed behavior converge without contradictory fraud or impersonation indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer, and all four observed IPv4 and IPv6 addresses were Cloudflare edge endpoints rather than origin candidates. This mainstream protective architecture reduces direct origin exposure and provides a meaningful security mitigation, although infrastructure protection alone is not proof of business legitimacy.

Closing Assessment

Prospective users may engage normally, while institutions contemplating paid or expanded services should complete routine contractual, privacy, and regulatory-scope due diligence appropriate to the intended use.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gocrypto.academy.

- The request stayed on gocrypto.academy. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-10. NOTED
- The earliest public archive of this site is from 2024-06-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gocrypto.academy at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
