

Is good-apps.co legit? TrustSniffer's high-trust assessment: 91/100

good-apps.co

Verdict

91

OUT OF 100

HIGH TRUST

good-apps.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 55%.

What this site appears to be

Commercial storefront for 'GoodApps' offering a portfolio of Shopify apps (urgency timers, spin wheel, image sliders, wholesale pricing, etc.), free trials, support and development services, and a blog with app comparisons and alternatives.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

A commercial storefront for GoodApps, this website presents a portfolio of Shopify applications—including sales-promotion, merchandising, customer-service, review, form, and store-utility tools—alongside free trials, development support, and educational blog content; its apparent business model is subscription and add-on sales to Shopify merchants.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent SaaS storefront with identifiable product categories, support and development services, free-trial calls to action, and links to established social and review platforms. Major reputation checks recorded no malicious or suspicious detections, no phishing indication, and no suspected brand impersonation. Two hidden forms were detected during both behavioral runs, but there were no password submissions to external destinations, no login form, no wallet interaction, no clipboard activity, and no external posting activity; this is a behavioral anomaly requiring contextual awareness, not evidence of impersonation or fraud. Six abuse reports relate to a shared content-delivery IP attributed to Webflow infrastructure rather than specifically to the website, so they do not establish site-level maliciousness.

EVIDENCE

- Homepage: presents GoodApps as a Shopify-app storefront with free trials, support services, app categories, and merchant-focused functionality.
- Homepage and behavioral testing: no login form, external password form, wallet-provider activity, wallet-drainer activity, or clipboard hijacking was detected.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no phishing indication; traffic presence is within the global top 1,000,000, with rank 65008.
- Hosting-IP reputation: 6 reports on 198.202.211.1, attributed to shared Webflow content-delivery infrastructure rather than uniquely to the site.

Regulatory Verification Notes

The available evidence is consistent with an established commercial software provider, but the real-world operator identity is not independently verified. The site material does not establish a specific corporate legal identity, regulatory registration, or license number; for a Shopify-app business, this is principally a merchant-disclosure and contracting transparency point rather than evidence of deception. Domain registration through GoDaddy.com, LLC and private registrant handling are administrative details, while the site's About and privacy

pages provide relevant locations for confirming the operating entity, data practices, and contractual terms. No relevant broker-reputation match was identified.

EVIDENCE

- Domain registration: registered 2022, approximately 4.04 years old, through GoDaddy.com, LLC; registrant details are handled through Registration Private / Domains By Proxy, LLC.
- Transport encryption: TLS certificate issued by WE1, validation level DV, valid to 2026-10-16T05:41:41+00:00.
- Hosting infrastructure: served from AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Site navigation: the homepage links to About and privacy pages, which are the appropriate locations for operator and data-handling disclosures.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity operating the service through the business's published contact and About information, and reconcile that entity with the contracting party shown during Shopify installation or subscription. Review cancellation, renewal, refund, add-on, and data-processing terms before starting a paid plan or free trial. Payment should use a method offering ordinary transaction protection, and official support channels should be confirmed through an independent route rather than relying solely on an on-site contact path.

EVIDENCE

- About and privacy pages: available within the site's primary navigation for identity, privacy, and business-practice review.
- Commercial workflow: the site offers free-trial and signup pathways, making subscription, renewal, and cancellation terms relevant before activation.
- Social presence: the site links to Facebook, Instagram, and Twitter profiles that can be compared with independently sourced business information.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate Shopify software website, while operator identity remains likely rather than independently verified. No scam, phishing, impersonation, or other contradictory signal was observed.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating at a CDN edge rather than exposing an origin server. This provides a meaningful mitigation against direct origin exposure and routine network abuse, although protective infrastructure is not, by itself, proof of business legitimacy.

Closing Assessment

Routine browsing and ordinary evaluation are proportionate; credential or payment actions should follow independent confirmation of the operating business, commercial terms, and available payment protections.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 6 reports on hosting IP 198.202.211.1 (Webflow, Inc, Content Delivery Network), 28% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of good-apps.co.

- The request stayed on good-apps.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-07-29. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about good-apps.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
