

Is goodwillpublicsecschool.com safe? TrustSniffer's moderate-trust assessment: 60/100

goodwillpublicsecschool.com

Verdict

goodwillpublicsecschool.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 70%.

What this site appears to be

Local school website for Goodwill Public School (New Delhi). Contains contact numbers, email, address, admissions information, gallery, and basic school descriptions. No payment flows or login forms detected.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What goodwillpublicsecschool.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Goodwill Public School is an informational website for a local primary and secondary school in New Delhi, presenting school background, curriculum and project materials, staff and management information, admissions procedures, forms, facilities, documents, gallery content, address details, and telephone contact information rather than online financial or commercial services.

Scam/Impersonation Risk

No contradictions were observed: the reviewed pages showed no phishing indicators, brand-impersonation markers, malicious redirects, login forms, payment flows, or suspicious scripts. The site's stated identity is internally consistent with an educational institution, including its description of Goodwill Public School and its claimed establishment and affiliation history. A separate reputational signal concerns the hosting IP, which has received substantial abuse reporting; however, the reporting is attributed to shared data-centre infrastructure rather than specifically to this website, so it is a contextual hosting concern and not evidence that the school site itself is malicious.

EVIDENCE

- The homepage identifies Goodwill Public School and describes school administration, admissions, curriculum, facilities, and claimed recognition by the Directorate of Education and affiliation with C.B.S.E.
- The contact and admissions pages provide school-related telephone, address, email, and application information without detected credential or payment collection.
- Domain registration records show registration on 2011-03-08, with an age of 15.47 years.
- The site's archive contains 217 snapshots across 14 tracked years, from 2013-06-16 through 2026-06-10.

Regulatory Verification Notes

The website presents a conventional school-information model and makes specific claims about governmental recognition and CBSE affiliation, but the available evidence does not independently verify those claims or connect the website conclusively to the real-world school operator. No specific licence, registration number, or authoritative registry reference was identified on the reviewed pages; this is a disclosure and verification gap rather than evidence of fraud. The available external broker context contains no match. The moderate posture is also informed by the hosting-related abuse signal described above, while the site's long registration continuity, stable archived presence, valid transport encryption, and coherent educational content support an established, apparently legitimate interpretation.

EVIDENCE

- The homepage and school-information pages state that the school was established in 1996 and claim recognition up to Class XII by the Directorate of Education and affiliation with C.B.S.E.
- No specific licence or registration number was displayed in the reviewed school, admissions, or contact content.
- Hosted on AS133643 (EWEBGURU-AS - EWEBGURU, IN); registry: APNIC; country: IN.
- TLS certificate issued by YE2, validation level DV, valid to 2026-10-10.

What to Verify Next

Before high-value payments, formal enrolment commitments, or submission of sensitive documents, the claimed school recognition and CBSE affiliation should be confirmed through the relevant official education registries. The legal identity of the operating school should also be matched against independently obtained institutional records, and contact channels should be confirmed through an offline or independently sourced route rather than relying solely on the website.

EVIDENCE

- The admissions pages provide application forms, admission criteria, schedules, and class information that can be compared with independently confirmed school procedures.
- The homepage supplies the institutional name, founder and manager references, location description, and claimed education affiliations for external matching.
- The contact page provides a telephone route suitable for independent confirmation of the institution and its admissions process.

Summary Verdict

The website presents a **moderate-trust, apparently legitimate educational presence** with no observed scam or impersonation contradiction. Its coherent school content and established technical and historical signals support ordinary informational use, while the absence of independently verified operator identity and the hosting-related reputational signal prevent a fully confident trust conclusion.

Infrastructure Integrity

The site resolves directly to a single hosting origin, with no detected CDN or WAF layer and no edge-IP distribution identified. This provides less intermediary resilience than a site behind mainstream protective infrastructure, but the observed posture is an infrastructure characteristic rather than evidence of malicious operation.

Closing Assessment

The site is suitable for routine informational use, while independent institutional and payment-protection checks should be completed before sensitive submissions, enrolment commitments, or high-value transactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

Signals weighed against the site

- AbuseIPDB: 748 reports on hosting IP 103.133.214.160 (Ewebguru, Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of goodwillpublicsecschool.com.

- The request stayed on goodwillpublicsecschool.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by ewebguru.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-08. NOTED
- The earliest public archive of this site is from 2013-06-16. CLEAR
- It is hosted on EWEBGURU-AS, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about goodwillpublicsecschool.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
