Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Portuguese-language adult-entertainment archive that presents free access to Playboy, Sexy, and other nude-model magazine content, organized by publication year and performer, with pagination and referrals to related adult sites; its likely commercial model is traffic-based advertising or referral placement rather than account-based services.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The homepage contains no login form, sensitive-data collection, financial solicitation, cryptocurrency functionality, or concealed form activity. Its established domain tenure, stable page delivery, meaningful traffic footprint, and consistently clean external reputation support the conclusion that this is a legitimate content site rather than an impersonation or credential-theft operation.

- The domain registration record identifies Daniel Goncalves Quintana as the registrant and shows registration on 22 April 2021 (~5.28 years old), with expiration on 22 April 2027.
- The homepage contains 3,245 characters of substantive index content and returned stable HTTP 200 responses in both observed interaction runs.
- Threat-reputation checks recorded 0 malicious and 0 suspicious detections, no safe-browsing malicious designation, no abuse reports, and no signature matches.
- The homepage exposes no login, password, wallet-connect, hidden, or externally submitted sensitive form.

Regulatory Verification Notes

The site operates as an informational adult-content archive and makes no claim to provide a regulated financial or investment service, so financial licensing is not applicable to its stated activity. The homepage does not establish how rights to the advertised magazine scans and celebrity imagery were obtained, nor does the supplied page evidence show legal terms addressing content authorization, age controls, privacy, or monetization. These are content-governance and disclosure considerations, not evidence of fraud.

- The homepage advertises free access to Playboy and Sexy magazine archives, including rare issues, arranged across publication-year categories and 43 index pages.
- The homepage's presented navigation includes magazine and adult-image categories but provides no observed legal, privacy, rights-management, or age-verification disclosure.
- The homepage makes no licensing, brokerage, investment, deposit-taking, or regulatory-status claim.

- The site's transport encryption uses a YR2-issued domain-validated TLS certificate, valid until 6 September 2026.

What to Verify Next

Before any commercial engagement, an enterprise should confirm content-distribution rights with the operator, review the applicable privacy and age-access terms, and establish the site's advertising and referral relationships. Official contact channels should be confirmed through an independent route if takedown, rights-management, or business correspondence is contemplated.

- The homepage identifies the service as a free archive but does not state explicit monetization terms.
- The homepage links visitors toward related adult-content destinations, making referral ownership and destination review relevant to commercial due diligence.
- No social-media presence, canonical page reference, structured metadata, or meta description was observed on the assessed homepage.

Summary Verdict

The website presents a legitimate, established adult-content archive with no observed scam, impersonation, phishing, or malicious-reputation contradiction. The evidence supports a high-trust posture for its stated informational purpose, and normal browsing, account login if subsequently offered through an authentic site workflow, and standard use are appropriate.

Infrastructure Integrity

The site is served from AS47583, operated by Hostinger International Limited, with four likely origin addresses and no detected CDN or WAF edge layer. Direct origin visibility provides less network-layer shielding than a reverse-proxy deployment, but the identified hosting, valid transport security, resolved infrastructure, and absence of reported abuse support an intact technical posture; protective hosting characteristics mitigate exposure but do not independently establish legitimacy.

Closing Assessment

Prospective users may interact with the authentic site normally, while organizations considering commercial, referral, or content-distribution relationships should complete proportionate contractual and rights due diligence.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gostosashd.blog.br.

- The request stayed on gostosashd.blog.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-22. NOTED
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gostosashd.blog.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
