

Is governo.it legit? TrustSniffer's high-trust assessment: 100/100

governo.it

Verdict

100

OUT OF 100

HIGH TRUST

governo.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official Italian government site (Presidenza del Consiglio dei Ministri) with institutional content, news, press releases, and contact information. Appears legitimate and informational with no commercial or financial solicitations.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is an Italian public-sector information portal presenting government news, press releases, institutional information, presidential and ministerial content, public contacts, transparency resources, and media galleries; its apparent purpose is to provide official information and public-service communications rather than sell products, solicit investments, or process commercial transactions.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing or impersonation indicators, blacklist detections, malicious or suspicious reputation findings, or page-level red flags. The homepage identifies the site with the Italian Government and Presidency of the Council of Ministers, and its content structure is consistent with an institutional information service. The available evidence therefore supports an apparently legitimate, established website, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Homepage: institutional navigation covers the President, Government, ministries, official measures, legal advertising, administrative transparency, privacy policy, and government communications.
- Homepage behavior: no login form, hidden form, password-external form, wallet connection, clipboard manipulation, or cloaking was detected.
- Domain registration: created 2000-01-24; age 26.57 years; registrar Reevo s.p.a.; registrant and organization fields identify Sogei S.p.A. and Presidenza del Consiglio dei Ministri.
- External reputation checks: VT malicious 0, VT suspicious 0, GSB malicious false, external blacklist false, and AbuseIPDB reports 0.

Regulatory Verification Notes

The website presents itself as a government information portal, not as a regulated financial, investment, or commercial service; consequently, a financial license is not relevant to the stated business model. Its pages include privacy, legal-advertising, administrative-transparency, and institutional-information sections, which provide meaningful disclosure context. The available records and the organization named in the transport certificate are consistent with the site's institutional presentation, but the operator connection should still be treated as apparent rather than proven because independent identity verification is not conclusive. No broker-dataset match was identified; that is contextual reputational support only and not a regulatory determination.

EVIDENCE

- Homepage: title and visible content identify “Governo Italiano” and the “Presidenza del Consiglio dei Ministri.”
- Homepage: links include “Amministrazione trasparente,” “Pubblicità Legale,” and “Privacy policy.”
- Transport encryption: DigiCert Global G3 TLS ECC SHA384 2020 CA1 issued an OV certificate to “Presidenza del Consiglio dei Ministri,” valid to 2026-12-01.
- Registration record: expiration date 2027-03-09 and registrar Reevo s.p.a.

What to Verify Next

Before any credential or payment interaction associated with a purported government service, independently confirm the domain and contact route through an official government directory or an offline institutional channel. Any request that departs from the site's informational purpose—such as payment collection, investment solicitation, or unusual credential capture—should be validated separately, including the responsible entity, applicable terms, and available payment protections.

EVIDENCE

- Homepage: no sensitive form, login form, or payment-oriented interaction was detected.
- Homepage: the stated service scope is informational, covering news, institutional activities, contacts, transparency, and public communications.
- Homepage: social links point to Facebook, Twitter, Instagram, YouTube, and LinkedIn accounts associated with the presented institution.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate public-sector website. The institutional identity connection is likely but not independently verified, so the trust conclusion should not be interpreted as definitive proof of the real-world operator.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed traffic terminating on CDN edge servers rather than a directly exposed origin; this reduces direct origin exposure and is a mitigating control, not proof of legitimacy.

EVIDENCE

- Hosting infrastructure: served from AS20940, AKAMAI-ASN1—Akamai International B.V., NL.
- Observed edge addresses: 173.222.105.12 and 173.222.105.24, both on AS20940; likely origin IP count 0.
- Infrastructure resolution: two unique IP addresses were observed, both classified as CDN edge addresses.

Closing Assessment

Normal informational browsing is proportionate to the evidence; credential or payment activity should remain conditional on ordinary independent confirmation of the responsible entity, the transaction purpose, and applicable protections.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of governo.it.

- The request stayed on governo.it. It was not redirected to another domain. CLEAR
- Registration is published under Reevo s.p.a.. CLEAR
- DNS for this domain is served by finanze.it. NOTED
- The registration is paid up to 2027-03-09. NOTED
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about governo.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
