Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Gravity Zone Australia is a Seaford-based indoor entertainment venue website presenting trampoline and activity attractions, birthday parties, group bookings, gift cards, café services, waivers, and customer account functionality for managing bookings and payments. Its apparent business model is a local family-entertainment operation monetising admission, event bookings, retail extras, and in-person services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there is no confirmed malicious, phishing, impersonation, or conflicting-identity signal. The website's content is consistent with a named local venue, with normal booking, waiver, and customer-account functions; behavioural testing found no hidden forms, wallet activity, credential exfiltration, cloaking, or suspicious script activity. One external reputation assessment produced a suspicious result, but it was recorded as a single unconfirmed signal and was not supported by malicious detections or other corroborating indicators. The available evidence therefore supports an apparently legitimate, low-risk website, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage identifies Gravity Zone Australia as an indoor entertainment venue and provides venue-specific attractions, party bookings, gift cards, waivers, and contact information.
- Behavioural analysis recorded no hidden forms, zero wallet-provider activity, zero wallet-drainer activity, zero clipboard hijack activity, and no cloaking.
- The domain was registered in 2013 and is approximately 13.23 years old.
- The site has 148 archive snapshots spanning 2013–2026, with 14 years tracked.

Regulatory Verification Notes

The site provides links to waivers, terms and conditions, other policies, contact information, careers, and booking-related services. The supplied pages do not claim a regulatory licence or provide a licence number; for a family-entertainment venue, this is a disclosure and verification matter rather than evidence of a scam. The site presents the trading identity “Gravity Zone Australia,” while the registration record names NASA LEISURE PTY LTD; this supports an apparent commercial registration connection but does not independently establish that the registrant is the current operator. The available evidence is consistent with an established site, but the operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage links to “Waiver, Terms & Conditions and Other Policies,” “Contact Us,” and “Careers.”
- The registration record lists Synergy Wholesale Accreditations Pty Ltd as registrar and NASA LEISURE PTY LTD as registrant.
- Hosting is recorded on AS133159, MAMMOTHMEDIA-AS-AP – Mammoth Media Pty Ltd, AU.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-09-20.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm that the venue identity, booking terms, cancellation or return conditions, and payment recipient correspond to the intended local business. The terms, waiver, booking, and gift-card pages should be reviewed for applicable restrictions, refund conditions, liability provisions, and any external payment-provider details. Contact channels should be confirmed through an independent offline or publicly established route, particularly for high-value group bookings or disputed transactions.

EVIDENCE

- The homepage provides the customer-login, booking, waiver, gift-card, and policy entry points requiring review.
- The page analysis identified three forms: login, booking/checkout, and waiver.
- The site links to Instagram and Facebook profiles, providing independent channels for business-presence comparison.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established, apparently legitimate local business website. The classification is reassuring, but it should not be treated as definitive proof of the real-world operator’s identity.

Infrastructure Integrity

The site resolves to a single Australian hosting endpoint operated by Mammoth Media Pty Ltd, with no CDN or WAF layer detected. This relatively direct hosting arrangement does not itself establish legitimacy, but the resolved infrastructure is stable and attributable to a named hosting organisation; the infrastructure should therefore be regarded as a supporting technical signal rather than proof of identity.

Closing Assessment

Ordinary browsing and venue research are proportionate, while account creation or payment should follow the independent merchant-identity, transaction-protection, and booking-policy checks outlined above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gravity-zone.com.au.

- The request stayed on gravity-zone.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Synergy Wholesale Accreditations Pty Ltd. CLEAR
- DNS for this domain is served by com.au, across 2 name servers. NOTED
- The earliest public archive of this site is from 2013-05-29. CLEAR
- It is hosted on MAMMOTHMEDIA-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gravity-zone.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
