

Is group.accor.com legit? TrustSniffer's high-trust assessment: 100/100

group.accor.com

Verdict

100

OUT OF 100

HIGH TRUST

group.accor.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Accor corporate site page presenting group overview, brands, investor information, news & stories, sustainability, careers and booking call-to-actions. Appears as a legitimate hospitality corporate presence with informational content and links to booking and recruitment channels.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is Accor Group's corporate hospitality portal, presenting an overview of its hotel brands, guest experiences, development activities, investor information, sustainability initiatives, careers, news, and booking pathways. Its apparent business model is the operation and franchising of global hospitality brands, supported by hotel bookings, loyalty services, management and franchise fees, partnerships, and related corporate activities.

Scam/Impersonation Risk

No contradictions were observed across the captured corporate content, technical evidence, historical continuity, or external reputation checks. The homepage presents a coherent Accor corporate identity, including named hotel brands such as Raffles, Fairmont, Sofitel, Novotel, Mercure, and ibis, together with investor, careers, sustainability, and booking functions rather than phishing, credential-harvesting, or high-risk financial solicitation. The available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage identifies "Accor Group" and provides corporate sections for group information, brands, hotel development, finance, news, sustainability, careers, and booking.
- The site's captured page contains no login form, hidden sensitive form, external password form, wallet interaction, or detected brand-impersonation indicator.
- Domain registration records show registration on 1998-02-23, an age of 28.48 years, expiry on 2027-02-22, and CSC Corporate Domains, Inc. as registrar.
- Web-archive records show 2,706 snapshots spanning 2019-03-02 through 2024-11-26, with 6 years tracked.

Regulatory Verification Notes

The captured material is corporate and hospitality-focused, with investor relations, leadership and governance, partnerships, and sustainability content. It does not present a financial-services licensing claim or registration number; that is a limited disclosure point relevant only if a proposed interaction involves a regulated service, and it is not evidence of impersonation or a scam. No matching third-party broker signal was identified, and the available reputation checks did not report malicious or suspicious findings.

EVIDENCE

- The homepage provides “Leadership & Governance,” “Finance,” “Investor Relations” content, and corporate communications for shareholders and stakeholders.
- The site’s stated business model concerns hotel operations and franchising, bookings, loyalty programs, management and franchise fees, partnerships, and hospitality services.
- The website is served from AS19551 (INCAPSULA - Incapsula Inc, US).
- The transport certificate is issued by GlobalSign Atlas R46 DV TLS CA 2026 Q2, uses DV validation, and is valid to 2026-08-30T15:21:35+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the intended booking, recruitment, investor, or partner channel is linked to Accor’s official corporate operations. Booking activity should be checked against the applicable cancellation, refund, and payment-protection terms, while corporate or regulated-service engagements should be matched to the relevant legal entity and, where applicable, the appropriate public registry.

EVIDENCE

- The homepage separates booking, careers, investor, and corporate-information pathways, allowing the intended interaction to be checked against its stated purpose.
- The “Finance,” “Leadership & Governance,” and investor-related content provide the appropriate starting points for independently confirming the relevant corporate entity.
- The booking call-to-action and guest-facing brand portfolio should be reconciled with the applicable merchant, cancellation, refund, and payment terms before transaction completion.

Summary Verdict

The overall posture is **high trust and low risk**, with converging evidence supporting an established, apparently legitimate corporate website and no observed scam or impersonation contradictions. Identity confidence remains qualified because the operator’s real-world identity has not been independently verified.

Infrastructure Integrity

The site is protected by Incapsula CDN/WAF infrastructure, with observed addresses corresponding to edge services rather than a directly exposed origin. This provides a meaningful layer of defensive separation and reduces direct origin exposure, while remaining a mitigating technical control rather than proof of legitimacy.

EVIDENCE

- Four CDN edge addresses were observed: 13.248.169.48, 45.60.151.180, 45.60.163.180, and 76.223.54.146.
- The infrastructure records identify 0 likely origin IP candidates and 4 observed edge IPs.
- DNS resolution was successful, with the observed infrastructure associated with ARIN registry data and US hosting geography.

Closing Assessment

Ordinary browsing and standard site functions are proportionate to the assessed posture; before submitting credentials or payment details, independent confirmation of the relevant merchant identity, return or cancellation terms, and payment protections remains appropriate.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of group.accor.com.

- The request stayed on group.accor.com. It was not redirected to another domain. CLEAR
- Registration is published under CSC Corporate Domains, Inc.. CLEAR
- DNS for this domain is served by indomco.com, across 5 name servers. NOTED
- The registration is paid up to 2027-02-22. NOTED
- The earliest public archive of this site is from 2019-03-02. CLEAR
- It is hosted on INCAPSULA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about group.accor.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
