Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established German-language accommodation directory that helps groups find properties across Germany and other European countries, browse by region or category, and arrange bookings directly with property owners; accommodation providers can also advertise their properties through the service.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or malicious reputation findings were observed. The site's long operating history, stable accommodation-directory purpose, clean external reputation, and conventional search functionality provide strong convergent evidence of legitimacy. The homepage does not solicit payment-card details, passwords, cryptocurrency, or other sensitive information through its search form.

- The homepage presents group accommodation listings for school trips, group travel, and private events, with navigation by German state, European country, region, city, and property category.
- The site has a reconciled domain age of approximately 26.8 years; 470 archive snapshots span 1999-10-11 to 2026-06-11, covering 28 tracked years with no suspicious repurposing detected.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing indication, and no confirmed adverse listing; the domain also holds a global traffic rank of 537,403.
- Behavioral examination completed 2 of 2 runs successfully and found no cloaking, hidden forms, external password submissions, wallet activity, clipboard hijacking, or untrusted external requests.

Regulatory Verification Notes

The service operates as an accommodation marketplace rather than a regulated financial or investment business, and the supplied pages make no regulated-product or licensing claims requiring corroboration. The homepage provides visible links to an Impressum, terms/privacy information, and a contact page, supporting a conventional German commercial-site structure. Booking is described as occurring directly with property owners, so the contractual role of the directory and the individual provider should be understood from the applicable terms for each transaction.

- The homepage exposes dedicated "Impressum," "AGB/Datenschutz," and "Kontakt" links alongside account and property-listing functions.
- The homepage states that visitors book directly with the property owner, distinguishing the directory from the accommodation supplier.
- The site is served from AS8560 by IONOS SE in Germany.

- Its transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 2026-12-11.

What to Verify Next

Before committing to a particular property, the prospective customer should confirm the owner’s identity, availability, total price, cancellation terms, and payment recipient using the listing details and an independently established contact route. Any deposit or balance should be paid only after the booking documentation identifies the accommodation, contracting party, dates, and refund conditions. Property providers considering a listing should review the directory’s commercial terms, fees, publication rules, and data-processing provisions before submitting an entry.

- The homepage invites visitors to obtain advice by telephone and publishes the German contact number +49 (02472) 80 35 886.
- Property owners are invited through the homepage to add their accommodation to the directory.
- The homepage advertises properties across Germany as well as Austria, Switzerland, the Netherlands, and Italy, making property-specific contractual and jurisdictional checks relevant.
- The sole observed homepage form is a search form with no sensitive fields or untrusted submission destination.

Summary Verdict

This is a legitimate, established, and trustworthy website with a coherent business purpose and no observed contradictory risk signals. The convergence of historical continuity, clean reputation, stable behavior, substantive content, and conventional commercial-site features supports high confidence in its identity and normal operation.

Infrastructure Integrity

The site uses CDN/WAF protection on IONOS infrastructure, with the observed IPv4 and IPv6 addresses operating as edge servers. The origin address was not exposed through the observed configuration, reducing direct infrastructure exposure; this is a security mitigation rather than independent proof of business legitimacy.

Closing Assessment

Normal browsing, account login, property-listing activity, and standard use are appropriate, with ordinary transaction diligence applied to the individual property owner and booking contract.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gruppenunterkuenfte.de.

- The request stayed on gruppenunterkuenfte.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by ui-dns.com, across 4 name servers. NOTED
- The earliest public archive of this site is from 1999-10-11. CLEAR
- It is hosted on IONOS-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gruppenunterkuenfte.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
