

Is gumusokambalaj.com safe? TrustSniffer's low-trust assessment: 40/100

gumusokambalaj.com

Verdict

40

OUT OF 100

LOW TRUST

gumusokambalaj.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

A Turkish packaging company's website describing product offerings (various woods, plywood, OSB), ISPM certification, measurement services, and contact details (address, phone, email). No forms or financial product offers present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://gumusokambalaj.com/

What gumusokambalaj.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This Turkish-language website presents Gümüőok Ambalaj as a local packaging and wood-products supplier, offering timber, plywood, firewood, OSB, packaging solutions, on-site measurement, and ISPM-stamped products through contact-led commercial sales.

Scam/Impersonation Risk

A confirmed **blacklist** hit creates a material contradiction that is not resolved by the otherwise coherent corporate presentation. External screening also recorded malicious and suspicious detections, while the site itself showed no login form, payment flow, financial-product offer, wallet connection, or other sensitive interaction mechanism. The business content is consistent with a packaging supplier rather than an impersonated financial service, and the domain has a long, continuous history with no detected repurposing; these are mitigating context, not sufficient grounds to disregard the external reputation signal.

EVIDENCE

- External reputation artifact: blacklist status recorded as true, with 1 malicious and 1 suspicious detection.
- Domain registration artifact: registered 2009-06-06 and approximately 17.22 years old.
- Web-archive artifact: 223 snapshots spanning 2009–2026, covering 18 tracked years with a maximum gap of 2 years.

Regulatory Verification Notes

The “Biz Kimiz” and contact content identifies “Gümüşok Ambalaj Ltd. Şti.” and provides a Konya address, telephone number, fax number, and business email. This supports an apparent local-business identity, but independent identity verification is not established. The site describes ISPM-stamped products and export utility without supplying an independently checkable certificate reference in the supplied pages; that is a verification gap for prospective commercial counterparties, not by itself evidence of fraud. The business is presented as a packaging and physical-goods supplier, so the principal regulatory question is the accuracy of its corporate and product-certification disclosures rather than financial-services licensing. A valid certificate and mainstream hosting arrangement show that the site is technically operational, but neither proves the operator’s identity nor offsets the external reputation contradiction.

EVIDENCE

- Hosting artifact: served from AS51559, NETINTERNET - Netinternet Bilisim Teknolojileri AS, Türkiye.
- Transport-security artifact: TLS certificate issued by YR2, validation level DV, valid to 2026-11-10.
- Identity-page observation: “Gümüşok Ambalaj Ltd. Şti.” and a physical address in Horozluhan Mahallesi, Selçuklu, Konya are displayed.

What to Verify Next

Before contracting, an organization should independently match the displayed company name and address against the relevant Turkish corporate registry and confirm that the contracting entity is the same business represented by the website. Any reliance on ISPM-stamped products should be supported by direct inspection of the applicable certification and confirmation with the issuing or recognized authority. Contact details should be confirmed through an independently obtained channel, and payment arrangements should use protections appropriate to the transaction and counterparty uncertainty.

EVIDENCE

- Homepage observation: the site contains no login form, sensitive form, or payment interface, so initial review can remain limited to ordinary browsing.
- Company-content observation: the stated model is contact-led commercial supply of physical goods and packaging services rather than an online financial transaction.
- Contact-page observation: the site provides telephone and fax contact routes in addition to written contact information.

Summary Verdict

The site presents a plausible small-business profile and has substantial historical continuity, but its overall posture is **low trust** because external threat intelligence records a confirmed reputation contradiction and the real-world operator remains unverified. Sensitive interaction risk is therefore elevated despite the absence of suspicious functionality in the captured pages.

Infrastructure Integrity

The website resolves directly to one likely origin address hosted by NETINTERNET - Netinternet Bilisim Teknolojileri AS on AS51559 in Türkiye; no CDN or WAF was identified. The valid DV TLS certificate protects transport confidentiality, but the infrastructure provides no independent assurance of business legitimacy and does not mitigate the recorded reputation concern.

Closing Assessment

Ordinary browsing may be used for preliminary information gathering, but credentials, payments, contractual commitments, and other sensitive interactions should remain deferred until the entity and relevant commercial claims have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of gumusokambalaj.com.

- The request stayed on gumusokambalaj.com. It was not redirected to another domain. CLEAR
- Registration is published under Digivity B.V.. CLEAR
- DNS for this domain is served by net.tr, across 2 name servers. NOTED
- The registration is paid up to 2027-06-06. NOTED
- The earliest public archive of this site is from 2009-07-24. CLEAR

- It is hosted on NETINTERNET, from a server in TR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gumusokambalaj.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
