Full analysis

Overview

gxjjcn.com is a Chinese-language adult media portal presenting free high-definition photo and video galleries organized by Japanese, Korean, fashion, lifestyle, and portrait categories, with daily updates, registration, and optional VIP content intended to support advertising, membership upgrades, and related content partnerships.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-behavior, or confirmed blacklist indicators. The homepage presents a conventional media-content interface, while observed browsing found no login form, hidden form, wallet activity, clipboard manipulation, suspicious scripts, or external posting behavior. The site's historical record is limited, but the available archive intelligence found no suspicious repurposing or semantic shift. The principal residual concern is operational rather than scam-specific: adult streaming sites may carry copyright and third-party media-player exposure that is not resolved by the absence of active threat signals.

EVIDENCE

- The homepage was captured successfully and contained substantive adult-media categories, recommendations, registration controls, and content descriptions; no brand impersonation was detected.
- Browser behavior recorded 2 successful runs, 0 external XHR requests, 0 suspicious inline scripts, 0 hidden forms, 0 wallet-provider detections, and 0 clipboard-write detections.
- Domain registration records show creation on 2017-06-15, with an age of 9.18 years; archive records were first seen on 2018-08-05 and last seen on 2025-07-10, with 0 snapshots and 8 years tracked.

Regulatory Verification Notes

The site presents itself as a consumer media service rather than a regulated financial or brokerage operation. Its public-facing content includes basic contact details and an ICP registration number, but the available material does not independently establish the legal entity operating the service or identify a regulated authorization; this is a transparency matter for verification, not evidence of fraud. Registration is through Gname.com Pte. Ltd., and privacy-redacted registrant fields should be treated as an administrative limitation. External reputation evidence is broadly benign, and no broker-related match was identified in the reviewed third-party context.

EVIDENCE

- The homepage identifies the service as a Chinese-language adult streaming and photo portal and displays an ICP registration number, but no independently verified legal-entity or regulated-license detail is documented in the supplied page evidence.
- The domain registration record lists Gname.com Pte. Ltd. as registrar, with an expiration date of 2027-06-15T09:33:31Z.
- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-10-13T16:36:07+00:00.

What to Verify Next

Before payment, credential submission, or other sensitive engagement, the site's stated registration identifier and operating entity should be checked against the relevant official registry. Contact channels should also be validated through an independently sourced route, and any membership or content-payment terms should be reviewed for refund, renewal, and data-handling conditions.

EVIDENCE

- Registry check: confirm the ICP identifier displayed on the homepage against the applicable official registration service.
- Identity check: establish the operating entity independently before entering into a paid VIP or membership relationship.
- Contact check: validate the published contact channels through a separate, trusted source before sensitive interaction.
- Transaction check: review the applicable membership, renewal, refund, and privacy terms before payment.

Summary Verdict

The website presents a **moderate-trust, apparently legitimate** posture with no observed scam or impersonation contradiction. Its content and technical behavior are consistent with a functioning consumer media service, while the specific real-world operator remains unverified; the assessment therefore supports ordinary caution rather than an accusation of fraud.

Infrastructure Integrity

Cloudflare CDN and WAF protection front the service, with all observed addresses identified as Cloudflare edge infrastructure and no origin candidate observed. This reduces direct origin exposure and is a mitigating technical control, but it does not independently establish operator legitimacy.

Closing Assessment

The proportionate course is to use the site only after independent confirmation of the operator and registration details, applying payment protections and limiting sensitive disclosures until those checks are complete.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about gxjjcn.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
