Full analysis

Overview

The website is the corporate banking portal of Türkiye Halk Bankası A.Ş., presenting retail, commercial, corporate, and investment banking alongside lending, deposits, cards, payments, insurance, pensions, digital banking, governance, sustainability, and investor-relations services.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, deceptive-return claims, or other fraud signals were observed. The institutional identity is consistent across the homepage content, certificate subject, hosting organization, and long-running domain history. Automated interaction testing also found no hidden forms, credential forwarding, clipboard interference, wallet-draining behavior, or cloaking.

- The homepage identifies Türkiye Halk Bankası A.Ş. and provides extensive banking, governance, management, security, and investor-relations content.
- The domain was registered in 1997 (~29.24 years old); 1,337 archive snapshots span 1998–2026 (29 years tracked), with no detected repurposing or semantic drift.
- External reputation checks recorded no malicious or suspicious detections, no reported abuse, and no confirmed phishing or impersonation signal.
- The tested homepage contained no sensitive or hidden form and no form submission to an untrusted destination.

Regulatory Verification Notes

The homepage provides substantial institutional material, including corporate-governance, board, organizational, articles-of-association, general-meeting, policy, risk-management, and trade-registry/MERSIS information pathways. However, the supplied page evidence does not establish an explicit licensing authority or license number. A broker-focused third-party dataset labels the domain “No Regulation,” but that result is a limited reputational signal rather than a legal determination and does not override the strong institutional evidence.

- The homepage navigation includes “Corporate Governance,” “Risk Management,” “Articles of Association,” “General Assembly,” and “Trade Registry and MERSIS Number Information.”
- The analyzed page makes no explicit licensing claim and supplies no license authority or license number.
- The domain-matched broker dataset reports “No Regulation,” no located license, a score of 1.56/10, and no reviews or elevated exposure signals.

- The site is served from AS20967 (HALKBANK-AS – TURKIYE HALKBANKASI A.S., TR); its organization-validated TLS certificate was issued by GeoTrust TLS RSA CA G1 to TÜRKiYE HALK BANKASI ANONİM ŞİRKETİ and is valid through 2026-12-16.

What to Verify Next

For regulated onboarding or counterparty due diligence, the bank's legal status and permitted activities should be confirmed directly with the applicable Turkish financial-services registry using the corporate name and registry identifiers published through the site. Official contact channels should be independently matched against registry or contractual records, while product terms, fees, and transaction authority should be reviewed under the institution's normal financial-control process.

- The homepage provides dedicated pathways for product and service fees, institutional policies, and corporate documentation.
- The site publishes management, overseas-branch, corporate-communications, security-awareness, and organizational information suitable for independent corroboration.
- The domain has an established top-one-million global traffic footprint, with a recorded rank of 54,341.

Summary Verdict

This is a legitimate, established, and trustworthy corporate banking website with strong convergence between institutional content, technical identity, historical continuity, and clean external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves to a single Turkish origin address operated within the bank's own network, with no CDN or WAF layer detected. Direct origin visibility provides less edge-layer shielding than a mainstream protective service, but the infrastructure-to-entity alignment is a meaningful mitigating signal and is not evidence of illegitimacy.

Closing Assessment

Prospective users may proceed with ordinary banking use while applying standard financial controls, such as accessing the known official domain directly and independently confirming unusual or high-value instructions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about halkbank.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
