Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Hammer Plumbing & Drain is a Los Angeles local-service website presenting plumbing, drain, sprinkler, sewer, water-main, leak-detection, emergency, and financing services. Its apparent business model is the generation of paid service calls, repairs, installations, and contracted home-service work, supported by telephone contact, service-area information, testimonials, and claims of 24-hour availability.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent local plumbing-contractor profile rather than a phishing, impersonation, or deceptive-investment model, and the available evidence contains no confirmed blacklist, phishing, malicious, or brand-impersonation signal. The homepage's service-oriented content, contact form, and absence of login, password-collection, hidden-form, wallet-connect, or cloaking behavior are consistent with ordinary customer acquisition. The published claim of more than 85 years of service is also consistent with the domain's documented continuity, although that claim is not by itself proof of the real-world operator's identity.

EVIDENCE

- The homepage identifies Hammer Plumbing & Drain as a Los Angeles plumbing, drain, sprinkler, sewer, and water-main service provider and reports no page-level red flags.
- Domain registration records show creation on 2012-09-25 and an age of 13.91 years.
- Archive records show 87 snapshots spanning 2012–2025, with 14 years tracked.
- External reputation checks recorded zero malicious and zero suspicious results, zero abuse reports, and an abuse-IP whitelist status for the observed CDN infrastructure.

Regulatory Verification Notes

The website presents itself as a licensed and insured plumbing provider and publishes a license number within its service and business content, but the available evidence does not independently verify the number or establish the operator's legal identity. This is a verification matter rather than an indication of scam activity. The site's apparent legitimacy is supported by its long operating footprint, consistent service content, clean available reputation signals, and valid transport security; however, the real-world operator remains unverified. Registration through GoDaddy.com, LLC, with private registration details, is an administrative ownership detail and does not constitute an identity contradiction. No matching third-party broker warning was identified.

EVIDENCE

- The homepage and business-content sections state that plumbers are fully licensed and insured and display a license number.
- The domain is registered through GoDaddy.com, LLC; creation date 2012-09-25; age 13.91 years; expiry 2026-09-25.
- The site is served from AS13335 through CLOUDFLARENET - Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-24T20:58:28+00:00.

What to Verify Next

Before credential or payment interactions, an interested party should confirm the published license number with the applicable local or state licensing registry, obtain the contracting legal name and written service terms, and review the financing conditions before accepting them. Contact channels should be confirmed independently, and payment should use a method that provides appropriate dispute or payment-protection rights. The site's service claims should also be matched against the entity named on any quotation, invoice, insurance documentation, or financing agreement.

EVIDENCE

- The homepage provides the business name, service areas, telephone contact, testimonials, and a license-number representation.
- The homepage states that 12-month interest-free financing is available.
- The contact functionality consists of one customer-contact form with no detected sensitive form fields or untrusted destination.
- Behavioral testing completed two successful runs and detected no hidden forms, password submissions, wallet activity, clipboard manipulation, or cloaking.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The site is suitable for ordinary service research and prospective engagement, while the operator's real-world identity should remain treated as independently unverified rather than proven.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF infrastructure, with observed traffic terminating on CDN edge addresses and no origin candidate identified in the analysis. This provides a mitigating layer against direct origin exposure and supports a stable, mainstream hosting posture, but infrastructure protection alone is not proof of business legitimacy.

EVIDENCE

- Observed edge infrastructure: AS13335, Cloudflare, Inc.; four CDN edge IP addresses were identified and zero likely origin IPs.
- The observed server address was 172.67.150.10 in the United States.
- TLS validation is DV, with issuer WE1 and validity through 2026-10-24T20:58:28+00:00.

Closing Assessment

Proceed with ordinary business diligence before submitting credentials or making payments, particularly by confirming the contracting entity, service terms, financing conditions, and available payment protections through independent checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hammerplumbinganddrain.com.

- The request stayed on hammerplumbinganddrain.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-25. NOTED
- The earliest public archive of this site is from 2012-10-27. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hammerplumbinganddrain.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
