

Is handelsbanken.se legit? TrustSniffer's high-trust assessment: 90/100

handelsbanken.se

Verdict

90

OUT OF 100

HIGH TRUST

handelsbanken.se appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 55%.

What this site appears to be

Swedish Handelsbanken homepage promoting personal and corporate banking, mortgages, savings, pensions, payment services, premium banking, financial guidance, fraud prevention, and round-the-clock customer support. The content provides a clear legal identity, phone numbers, branch availability, security instructions, and links to legal and privacy information.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the Swedish Handelsbanken banking portal, presenting personal and corporate accounts, mortgages and other lending, savings, pensions, payments, investment management, premium banking, financial guidance, customer support, and secure access to online banking services.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam-related conflicts were observed. The homepage consistently identifies Handelsbanken, provides branch and telephone support routes, publishes security and fraud-prevention guidance, and directs customers to distinct personal and corporate banking access options. Its long-established domain, substantial global traffic presence, clean threat reputation, and stable observed behaviour strongly support authenticity.

- The domain registration record shows registration on 10 October 1994, making the domain approximately 31.84 years old; the registrar is CSC Corp Domains.
- The homepage identifies the service as Handelsbanken and presents physical-branch availability, telephone support, security information, and separate personal and corporate login routes.
- External reputation observations recorded 0 malicious and 0 suspicious detections, with no phishing or confirmed threat listing.
- The domain is ranked 50,667 in the observed global traffic index, placing it within the top one million websites.

Regulatory Verification Notes

The homepage supplies a clear institutional identity and links to legal, privacy, and cookie information, but the supplied page content does not establish a specific supervisory authority, banking authorization, or registration number. A third-party broker dataset characterizes the matched domain as having no identified regulation or licence; that classification is a limited reputational signal and is not a legal determination of Handelsbanken's banking authorization. The organization-validated certificate naming Svenska Handelsbanken AB materially strengthens the connection between the domain and the stated institution.

- The homepage names Handelsbanken and provides links to legal and privacy information, but the captured page does not state a licence number or supervisory authority.
- A domain-exact third-party broker record reports "No Regulation" and no licence found, with no reviews or elevated exposure signals; this is contextual reputation data rather than registry evidence.

- The site is served from AS3301 (TELIANET-SWEDEN — Telia Company AB, SE).
- The site's TLS certificate is issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 with organization validation, identifies Svenska Handelsbanken AB as the subject organization, and is valid until 21 September 2026.

What to Verify Next

For regulated onboarding, counterparty due diligence should confirm the institution's legal name, authorization, and permitted activities directly in the relevant official financial-services registry, then reconcile those records with the legal notices and contractual entity applicable to the intended service. Official contact channels should also be confirmed through an independently sourced branch or telephone directory before unusual payment instructions or material account changes are accepted.

- The homepage offers both personal and corporate customer journeys, making the applicable contracting entity and service terms relevant to institutional onboarding.
- The site provides branch access and telephone support, enabling independent confirmation through established channels.
- The homepage includes legal, privacy, and security resources suitable for comparison with authoritative registry records and customer documentation.

Summary Verdict

This is a legitimate, established, and trustworthy banking website. Its institutional identity, mature provenance, clean external reputation, professional content, and coherent customer-service structure converge strongly, with no observed contradictions undermining authenticity.

Infrastructure Integrity

The site resolves directly to a Swedish address operated through Telia's network, with one likely origin address and no CDN or WAF identified. This straightforward hosting posture provides no CDN-based origin shielding, but the resolved provider, geography, and institutional hosting context are coherent and present no confirmed infrastructure concern.

Closing Assessment

Normal interaction, including account login, account activity, and standard banking use, is appropriate; regulated institutions should apply their ordinary financial-counterparty due-diligence controls for formal onboarding or unusually consequential transactions.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of handelsbanken.se.

- The request stayed on handelsbanken.se. It was not redirected to another domain. CLEAR
- Registration is published under CSC Corp Domains. CLEAR
- DNS for this domain is served by 198.50 2a01:3f1:3050::53, across 6 name servers. NOTED
- The registration is paid up to 2026-12-31. NOTED
- It is hosted on TELIANET-SWEDEN, from a server in SE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about handelsbanken.se at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
