

Is handyhost.ru legit? TrustSniffer's high-trust assessment: 90/100

handyhost.ru

Verdict

90

OUT OF 100

HIGH TRUST

handyhost.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Russian-language commercial hosting site offering shared hosting, domains, VPS and dedicated servers, with promotions (e.g. 3 free months for transfer) and a referral program. Contact channels and support/ticket/live-chat are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

HandyHost is a Russian-language commercial web-hosting and domain-registration website offering shared hosting, domains, a site builder, SSL services, VPS, and dedicated servers. It presents paid infrastructure plans, transfer promotions, and referral incentives, with the apparent business model of monetising hosting, domain sales, add-on services, and customer support.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no identified phishing, brand-impersonation, or conflicting-identity indicators. The homepage presents a coherent hosting-provider proposition, while observed behavior showed no hidden forms, credential-harvesting form, cloaking, wallet activity, or suspicious script behavior. One isolated, unconfirmed external reputation signal was recorded, but it is not corroborated by the site content, behavioral evidence, or broader reputation indicators and therefore does not alter the low-risk assessment. The site's long-established registration and sustained historical presence further support continuity rather than a recently created impersonation. Evidence:

- Domain registration records: registered 2009 (~17.52 years old).
- Web archive: 279 snapshots spanning 2010–2026 (17 years tracked), with a maximum recorded gap of 1 year.
- Homepage behavior: no login form, hidden form, password-external form, wallet connection, clipboard activity, cloaking, or suspicious inline script was detected.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate hosting business, but the real-world operator identity is not independently verified. The reviewed content does not establish a regulated licence or registration number; for this non-financial hosting model, that is a transparency and verification point rather than evidence of a scam. The site has an established global traffic footprint, and its transport security is provided by a recognised certificate issuer. Evidence:

- Hosting infrastructure: served from SYSTEM-SERVICE-AS - System Service Ltd., RU, on AS50448.
- TLS certificate: GlobalSign GCC R6 AlphaSSL CA 2025, domain-validated, valid to 2027-02-20.
- Traffic footprint: rank 22861 and within the top 1,000,000 sites.
- Registration record: registrar listed as REGTIME-RU.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the legal merchant name associated with the service, review the applicable service, cancellation, and refund terms, and establish which payment-protection mechanisms apply. The published contact routes should be validated through an independently sourced business record or offline channel, and invoices or payment instructions should be checked for consistency with the confirmed merchant identity. Evidence:

- Homepage: publishes contact, customer-support, ticket, and live-chat routes.
- Homepage: provides defined hosting, domain, VPS, and dedicated-server plan categories with stated commercial pricing.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website rather than a scam or impersonation operation. The principal residual issue is uncertainty about independently connecting the website to a specific real-world operator, not evidence of malicious intent.

Infrastructure Integrity

The site resolves directly to a hosting address rather than through a detected CDN or WAF edge, with one likely origin address identified. The infrastructure is hosted by SYSTEM-SERVICE-AS - System Service Ltd., RU, on AS50448; this is a neutral technical characteristic and should be treated as context rather than proof of legitimacy.

Closing Assessment

Ordinary use may proceed subject to the standard independent merchant-identity, terms, and payment-protection checks required before submitting credentials or making payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of handyhost.ru.

- The request stayed on handyhost.ru. It was not redirected to another domain. CLEAR

- Registration is published under REGTIME-RU. CLEAR
- DNS for this domain is served by 148.36, across 2 name servers. NOTED
- The registration is paid up to 2027-02-09. NOTED
- The earliest public archive of this site is from 2010-02-20. CLEAR
- It is hosted on SYSTEM-SERVICE-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about handyhost.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
