

Is hanime.tv legit? TrustSniffer's high-trust assessment: 90/100

hanime.tv

Verdict

90

OUT OF 100

HIGH TRUST

hanime.tv appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

A mid-maturity adult hentai video streaming and community site offering free streamed content, user accounts and a premium membership option; links to external partners and a large Discord community are present.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

hanime.tv is an established adult video streaming and community platform that presents free online media, user accounts, and optional paid access for visitors seeking curated anime-related adult content.

Scam/Impersonation Risk

No contradictions were observed. The homepage identifies a consistent media-streaming purpose, provides ordinary sign-in and account-creation functions, and does not show brand impersonation, phishing behavior, hidden forms, external password submission, wallet activity, or credential-harvesting indicators in the available analysis. The site's specific model includes free 720p/1080p streams, uploaded and curated videos, premium membership, partner links, and a Discord community; these create ordinary content-policy and third-party-link considerations for an adult media service, but do not establish an impersonation or scam pattern. External reputation checks found no malicious or suspicious detections, and the domain has a long-established registration history.

EVIDENCE

- The homepage presents the stated streaming catalog, account functions, premium membership, recent uploads, partner links, and community access.
- The homepage contains sign-in, account-creation, and contact forms; no hidden forms, external password forms, wallet connections, or clipboard-hijacking behavior were observed.
- External reputation checks reported no malicious or suspicious detections and no confirmed phishing or impersonation indicators.
- Domain registration: 2014-05-10; age 12.26 years.

Regulatory Verification Notes

The site provides Terms of Use, an EULA, Privacy Policy, Cookies Policy, and a 2257 Statement, giving visitors a defined set of operating and privacy disclosures. The available evidence does not identify a claimed license or registration number; for this adult-media business model, that is a verification and disclosure point rather than evidence of deception. The domain is registered through NAMECHEAP INC, while the transport certificate is a valid, known-issuer DV certificate. Overall, the legal-page structure and technical consistency support an established online service, although any jurisdiction-specific operating requirements remain outside the available evidence.

EVIDENCE

- The homepage links to Terms of Use, EULA, Privacy Policy, Cookies Policy, and a 2257 Statement.
- Domain registration: 2014-05-10; expiration 2028-05-10; registrar NAMECHEAP INC.
- Hosting infrastructure: AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- TLS certificate: issuer WE1; validation level DV; valid to 2026-10-06T07:10:48+00:00.

What to Verify Next

Before institutional or jurisdiction-sensitive engagement, confirm whether the service's published legal disclosures and adult-content compliance statements satisfy the requirements applicable to the relevant operating location. For paid access, confirm the membership terms, cancellation mechanics, and permitted use through the site's own account and terms pages. Contact-channel validation should use the contact page and, where material, an independently confirmed official route.

EVIDENCE

- The Terms of Use and EULA provide the primary contractual terms for account and service use.
- The 2257 Statement is the site-specific page addressing adult-content compliance disclosure.
- The Premium Membership and Account pages provide the relevant locations for reviewing paid-access and account mechanics.
- The Contact Us page provides the site's published support route.

Summary Verdict

The overall posture is **high trust**: the website reads as legitimate, established, and suitable for normal interaction. Account login and standard use are appropriate, with no observed contradiction requiring a heightened security posture.

Infrastructure Integrity

The site is delivered through Cloudflare's CDN and WAF, with observed traffic terminating on Cloudflare edge infrastructure rather than directly exposing an origin server. This provides a meaningful mitigation against direct origin exposure and supports infrastructure integrity, while remaining a protective control rather than proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; routine review of the site's terms and applicable organizational policies should accompany any paid or business-related engagement.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	55/100
Identity verification confidence	30%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hanime.tv.

- The request stayed on hanime.tv. It was not redirected to another domain. [CLEAR](#)
- Registration is published under NAMECHEAP INC. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-05-10. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hanime.tv at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
