Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the German edition of Harper's BAZAAR, presenting attributed journalism on fashion, beauty, runway, culture, travel, sustainability, and lifestyle while operating through advertising, affiliate commerce, newsletters, and paid print and digital subscriptions.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or deceptive behavior were observed. The site's extensive historical continuity, established audience footprint, clean external reputation, and consistently magazine-oriented content strongly support its legitimacy. Testing identified neither sensitive or concealed forms nor suspicious external submissions, cloaking, wallet interactions, or clipboard manipulation.

- The domain's provenance record indicates registration in 2013 and an age of approximately 13 years.
- The web archive contains 1,037 snapshots spanning 11 August 2013 to 5 July 2026, covering 14 tracked years with no suspicious repurposing detected.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no unsafe-browsing finding, no abuse reports, and a global traffic rank of 55,924.
- The homepage presented named article authors and recognizable editorial categories, while two completed behavioral runs detected no hidden forms, external posts, suspicious scripts, or cloaking.

Regulatory Verification Notes

The site operates as an editorial and publishing property rather than as a regulated financial service, and it makes no financial-license claim requiring validation. Its navigation provides an imprint, privacy information, terms of use, privacy controls, and media information, which is consistent with a commercially operated German publication. Advertising is explicitly labelled, supporting a clear distinction between editorial and sponsored material; no adverse broker-reputation match was identified.

- The homepage navigation includes "Impressum," "Datenschutz," "Nutzungsbedingungen," privacy settings, and "Mediadaten."
- Commercial material on the homepage is marked "Anzeige," alongside independently attributed editorial articles.
- The site is served from AS13335 (Cloudflare, Inc., US); its DV TLS certificate was issued by WE1 and is valid until 13 September 2026.

What to Verify Next

For procurement, advertising partnerships, or other contractual engagement, the contracting entity and authorized representatives should be matched against the current imprint and agreement documents. Subscription purchasers should review the applicable term, renewal, cancellation, and privacy provisions at the point of purchase, while enterprise counterparties should confirm official commercial contacts through independently established corporate channels.

- The homepage offers print and e-paper subscriptions, making the published subscription terms relevant to paid engagement.
- The site promotes newsletters, affiliate-linked fashion products, and commercial media partnerships, each of which may involve distinct consent or contractual conditions.

Summary Verdict

The website is a legitimate, established, and trustworthy publishing property. Its identity, content quality, historical continuity, external reputation, and observed behavior converge without contradictory risk signals, supporting a high-confidence assessment suitable for normal use.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF layer across four observed edge addresses. The origin server was not exposed through the observed resolution path, which reduces direct infrastructure exposure; this protective architecture is a security mitigation rather than independent proof of business legitimacy.

Closing Assessment

Normal browsing, account login, subscription activity, and standard interaction are appropriate, with ordinary contractual due diligence for material commercial engagements.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of harpersbazaar.de.

- The request stayed on harpersbazaar.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED

- The earliest public archive of this site is from 2013-08-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about harpersbazaar.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
