Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is the Greek edition of Harper's BAZAAR, presenting editorial coverage of fashion, beauty, celebrity news, entertainment, lifestyle, wellness, travel, food, and culture. Its apparent business model is an established media publication supported by advertising, audience engagement, partnerships, sponsored content, and newsletter distribution.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malware, or conflicting-identity indicators were observed. The homepage's substantial editorial content, coherent Harper's BAZAAR branding, newsletter-only form, and absence of login or sensitive-data forms are consistent with an informational media publication rather than a deceptive transaction site. External reputation checks were clean, and the site's established traffic presence further supports its legitimacy.

- The homepage is classified as a media publication covering fashion, beauty, entertainment, lifestyle, wellness, travel, food, and culture.
- The homepage contains one newsletter-signup form and no login, password, wallet, or other sensitive form.
- Major external reputation checks recorded no malicious or suspicious detections; no broker-dataset match was present.

Regulatory Verification Notes

The homepage presents an editorial and advertising-supported media model, not a service that claims to provide financial, investment, payment, or other regulated products. No licensing representation is made in the supplied content; this is consistent with the stated publishing purpose, while any jurisdiction-specific corporate or media disclosures would need to be confirmed from the publisher's own legal materials if required for onboarding.

- The stated business model is advertising, audience engagement, partnerships, commercial sponsorships, and newsletter distribution.
- The homepage includes privacy-consent functionality describing data processing and preference management.
- The site is hosted on AS20940 (AKAMAI-ASN1 - Akamai International B.V., NL).
- Its TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-09-23.

What to Verify Next

For institutional onboarding, confirm the publisher identity and applicable media or advertising disclosures through the site's official legal and privacy pages, and independently confirm that any commercial partnership or sponsored-content claims correspond to the named publisher.

- The homepage identifies itself as Harper's BAZAAR and provides a consistent editorial publication profile.

- The homepage’s consent mechanism identifies privacy controls and the involvement of publishing partners.
- The available form is limited to newsletter distribution rather than financial or account activity.

Summary Verdict

The website presents as a legitimate, established, high-trust editorial publication with no observed scam or impersonation contradictions. Its content, functionality, reputation, and technical posture converge on a normal, trustworthy media-use profile.

Infrastructure Integrity

The site uses Akamai-hosted infrastructure and a currently valid DV TLS certificate, providing standard transport protection and a mitigating layer against direct exposure of the publishing service. These controls support infrastructure integrity but are not, by themselves, proof of organizational legitimacy.

- Hosting infrastructure: AS20940, AKAMAI-ASN1 - Akamai International B.V., NL.
- TLS certificate: issuer YR1; validation level DV; expiry 2026-09-23.

Closing Assessment

Normal browsing, newsletter interaction, account login where offered, and standard site use are appropriate within the publication’s stated media context.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of harpersbazaar.gr.

- The request stayed on harpersbazaar.gr. It was not redirected to another domain. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about harpersbazaar.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
