Full analysis

Overview

Hazar Mobilya is a Turkish furniture retailer and wholesaler website presenting bedroom furniture, sofa sets, dining-room products, company information, and contact details for prospective retail, project, and corporate customers.

Scam/Impersonation Risk

No contradictions were observed. The site does not present phishing, brand-impersonation, cryptocurrency, investment, or other high-risk abuse indicators; its pages describe a conventional furniture-sales model, and testing found no login, payment, wallet-connection, hidden-form, or suspicious external-posting behavior. External reputation checks recorded no malicious or suspicious detections, although coverage was partial, so this supports rather than proves legitimacy.

EVIDENCE

- The homepage and product navigation present bedrooms, sofa sets, and dining-room sets, with no investment or credential-collection functionality.
- The contact and company content identifies Hazar Mobilya and provides a telephone number, email address, and physical address.
- Behavioral testing recorded 0 external XHR requests, 0 wallet-provider detections, 0 hidden forms, and 0 password-external forms across 2 successful runs.
- Archival records show 44 snapshots spanning 2007–2026, with 17 years tracked.

Regulatory Verification Notes

The available evidence is consistent with an ordinary furniture wholesaler or retailer, but the real-world operator identity is not independently verified. The company presentation states that Hazar Mobilya was established in 2025 and targets retail stores, projects, and corporate customers; the site does not provide a clearly verifiable corporate registration or business-license reference. For this type of commercial activity, that is a transparency and counterparty-verification matter rather than evidence of impersonation. The transport certificate, identifiable hosting arrangement, and clean available reputation provide supporting technical context, while the limited independent authority signal means the site should not be treated as independently established solely on web presence.

EVIDENCE

- WHOIS records show registration on 2025-09-24, with an age of 0.9 years.
- Hosting is identified as AS34619, CIZGI - CIZGI TELEKOMUNIKASYON ANONIM SIRKETI, TR, in Turkey.
- The site uses a valid DV TLS certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-12-04.
- The company-information content describes wholesale supply to retail, project, and corporate customers but provides no license or registration number.

What to Verify Next

Before a high-value order, the proposed counterparty should be matched independently to the physical business address and the legal entity named on quotations, invoices, and payment instructions. Delivery, returns, warranty coverage, and payment-protection arrangements should be confirmed in writing, and any applicable business registration should be checked with the relevant Turkish registry or commercial authority. Official contact channels should also be confirmed through an independent route before sensitive information or funds are exchanged.

EVIDENCE

- The company-information page contains the stated business description and should be reconciled with contracting documents.
- The contact page provides the channels and physical address to be independently validated.
- Product pages support the stated furniture-retail business model but do not themselves establish counterparty identity or transaction protections.

Summary Verdict

The site has a **moderate-trust posture**: its content, observed behavior, and available technical and reputation signals are consistent with a conventional furniture business, and no scam or impersonation contradiction was identified. Confidence remains measured because the operator’s real-world identity is not independently verified and the site’s disclosure is not sufficiently definitive for unconditional reliance on high-value transactions.

Infrastructure Integrity

The site is hosted directly on infrastructure operated by CIZGI in Turkey, with one resolved IP address and no detected CDN or WAF layer. This is a straightforward hosting posture with no apparent edge-layer concealment; the absence of a protective CDN is not itself evidence of malicious activity.

Closing Assessment

Ordinary browsing and initial commercial contact are proportionate, while high-value orders or sensitive exchanges should proceed only after independent counterparty, contractual, and payment-protection checks are complete.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hazarmobilya.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
