Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

HDmall is an established Thai healthcare marketplace that enables visitors to discover and purchase fixed-price or promotional services from clinics and hospitals, spanning health screening, vaccination, dentistry, cosmetic care, fertility, wellness, and surgery; its apparent business model is based on bookings, referrals, and provider promotion.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other fraud indicators were observed. The homepage presents a coherent healthcare marketplace rather than an investment or credential-harvesting proposition, while the domain's sustained historical presence and clean external reputation strongly support the conclusion that this is the legitimate HDmall service. Interactive testing also found no hidden forms, untrusted form destinations, wallet-related behavior, clipboard manipulation, suspicious scripts, or cloaking.

- The homepage consistently presents healthcare packages from clinics and hospitals, including examinations, vaccines, dental treatment, cosmetic procedures, fertility services, wellness care, and surgery.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse against the assessed infrastructure.
- The domain was registered in 2020 and is approximately 6.3 years old.
- Historical records contain 548 archive snapshots from 2020-04-16 through 2026-07-07, covering 7 tracked years without evidence of suspicious repurposing or semantic drift.

Regulatory Verification Notes

The available homepage evidence identifies HDmall's commercial role as a marketplace connecting consumers with healthcare providers, but it does not establish a site-level claim to hold a healthcare license or provide a corporate registration number. This is a limited disclosure-verification matter rather than evidence of deception: licensing and professional authorization may attach to the individual clinic, hospital, practitioner, or procedure rather than to the marketplace itself. No conflicting legal-entity names were identified, and the absence of a match in the supplied broker-intelligence dataset has no material relevance to this non-broker healthcare business.

- The homepage provides access to a consolidated policies area and describes services supplied through clinics and hospitals, supporting a marketplace rather than direct-provider interpretation.
- The observed page content contains no healthcare-license authority or license number attributed to HDmall.
- The domain is registered through THNIC.
- The site uses a DV TLS certificate issued by WE1, valid until 2026-10-24.

What to Verify Next

For regulated, invasive, or clinically consequential services, the prospective purchaser should confirm the named provider’s facility license, the treating professional’s credentials, the package scope, exclusions, cancellation terms, and clinical follow-up arrangements through the applicable Thai authority or the provider’s independently sourced channels. The marketplace’s official assistance channel and the selected provider’s booking confirmation should also be reconciled before payment.

- The homepage advertises both routine and clinically significant services, including cancer screening, vaccination, LASIK, cosmetic surgery, fertility-related care, and gender-affirming procedures.
- The homepage exposes a policies area that should be reviewed for purchase, refund, privacy, and dispute terms.
- The homepage publishes the Line administrator handle “@hdcoth” and offers administrator assistance when a service cannot be found.

Summary Verdict

HDmall presents as a legitimate, established, and trustworthy healthcare marketplace. Its identity, operating history, content, behavior, and external reputation converge without contradictory risk signals, making normal interaction, account login, and standard use appropriate.

Infrastructure Integrity

The website is protected by Cloudflare’s mainstream CDN/WAF infrastructure. All four observed addresses were Cloudflare edge nodes, and no origin candidate was exposed; this reduces direct origin exposure but is a security-control signal, not independent proof of business legitimacy.

- The site is served from AS13335 (Cloudflare, Inc., US).
- The hosting assessment identified four CDN edge addresses—two IPv4 and two IPv6—and no likely origin address.

Closing Assessment

Prospective users may use the site normally, while applying ordinary healthcare-purchasing diligence to the credentials and terms associated with the selected provider and service.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hdmall.co.th.

- The request stayed on hdmall.co.th. It was not redirected to another domain. CLEAR
- Registration is published under THNIC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2020-04-16. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hdmall.co.th at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
