

Is healingenergyconnect.com safe? TrustSniffer's moderate-trust assessment: 50/100

healingenergyconnect.com

Verdict

50

OUT OF 100

MODERATE TRUST

healingenergyconnect.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A small business site for holistic energy healing offering information about modalities (Reiki, energized water), testimonials, blog posts, and a promoted free 30-minute review to onboard clients. Remote and local in-person options are mentioned.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Healingenergyconnect.com is a small health-and-wellness service website presenting holistic energy-healing services, including Reiki, energized water, remote sessions, and local appointments in Bel Air and Forest Hill, Maryland. Its apparent business model is to attract prospective clients through informational content, testimonials, blog material, and a free 30-minute review that leads into paid services.

Scam/Impersonation Risk

The site does not present observed login forms, credential collection, wallet functionality, deceptive redirects, or page-level phishing indicators, and no brand impersonation or conflicting legal-entity identities were identified. However, this benign presentation is outweighed by a material external contradiction: the domain is blacklisted, and three malicious detections were recorded in external reputation checks. That finding does not establish that the energy-healing content itself is fraudulent, but it creates a significant risk for sensitive interactions and prevents the site's service-oriented appearance from being treated as sufficient evidence of safety.

EVIDENCE

- The homepage presents energy-healing, Reiki, energized-water, testimonial, blog, and free-review content without a login form or sensitive data form.
- The site's observed behavior recorded zero external posts, zero external XHR/fetch activity, no hidden forms, and no wallet-connect or wallet-drainer activity.
- The domain was registered on 2016-10-25T21:05:03Z and is approximately 9.82 years old.

Regulatory Verification Notes

The available pages identify the service categories and provide About, Services, Testimonials, Blog, and Contact navigation, but the supplied site evidence does not establish an independently verified operator identity or disclose a licensing authority or license number. This is a regulatory and transparency verification gap rather than, by itself, proof of fraud. The external broker-reputation dataset produced no matching record, which is neutral context and not a licensing determination. Transport and hosting signals are technically consistent with a functioning website, but they do not validate the underlying business or its health-related claims.

EVIDENCE

- The site's service and informational pages describe holistic energy-healing offerings but provide no claimed license authority or license number.
- The domain registration lists GoDaddy.com, LLC as registrar; the registration expires on 2026-10-25T21:05:03Z.
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- The transport certificate is DV, issued by YE2, and valid to 2026-09-26T21:58:21+00:00.

What to Verify Next

Before any paid engagement or disclosure of personal information, independently confirm the operator's legal name, service location, refund terms, and the basis for any health-related representations. Where the services are subject to professional or local requirements, confirm the relevant authorization directly with the applicable public registry rather than relying solely on the website. Official contact channels should also be confirmed through an independent route, and payment protections should be assessed before a transaction.

EVIDENCE

- The About, Services, and Contact pages are the relevant locations for confirming the operator, service scope, and business terms.
- The homepage's free 30-minute review is the stated onboarding mechanism for prospective clients.
- The supplied evidence records the site's licensing status as unverified and its on-page disclosure state as unclear.

Summary Verdict

The overall posture is **moderate trust with elevated sensitive-interaction risk**. The site's content is coherent and informational, but the confirmed external reputation contradiction and lack of independently verified identity prevent a positive trust determination.

Infrastructure Integrity

Cloudflare CDN/WAF protection and edge-served infrastructure reduce direct exposure of the underlying host and are mitigating technical controls, not proof of legitimacy. All observed addresses were Cloudflare edge addresses, and the origin server was not observable in this analysis.

EVIDENCE

- Observed edge addresses were 104.21.24.49, 172.67.216.213, 2606:4700:3032::ac43:d8d5, and 2606:4700:3035::6815:1831, all associated with AS13335.
- Hosting infrastructure identified CLOUDFLARENET — Cloudflare, Inc., US, with four observed edge IPs and zero likely origin IPs.

Closing Assessment

Engagement should remain limited until the operator, applicable authorization, service terms, and payment protections are independently confirmed; credentials, sensitive personal information, and payment details should not be submitted during that process.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of healingenergyconnect.com.

- The request stayed on healingenergyconnect.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-25. NOTED
- The earliest public archive of this site is from 2017-07-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about healingenergyconnect.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
