Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

HealthyWallet is an informational personal-finance website presenting guidance on saving, investing, earning more, credit management, and inflation, with an apparent business model based on educational content, advertising, and possible affiliate or sponsored recommendations.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent informational purpose, contains no login or sensitive-data form, and shows no evidence of phishing, credential harvesting, brand impersonation, deceptive transactions, or direct handling of user funds. External reputation checks found no malicious or suspicious detections.

- Homepage content identifies the site as “Healthy Wallet” and organizes material under Saving, Investing, Making Money & Earning More, Credit, and Inflation.
- Homepage interaction analysis found no login form, hidden form, sensitive form, wallet connection, or clipboard-hijacking behavior.
- The domain was registered in 2023 and is approximately 3.55 years old.

Regulatory Verification Notes

The site identifies ownership and operation by MediaForce.com and provides Terms of Service, Privacy Policy, California privacy notices, Do Not Sell disclosures, and an Advertiser Disclosure. No financial-services license or registration number is presented; because the site describes itself as educational and does not appear to sell financial products or handle user funds, this is a transparency item for regulatory confirmation rather than evidence of misconduct. Registration is through GoDaddy.com, LLC, while registrant privacy is an administrative detail.

- The homepage footer attributes ownership and operation to MediaForce.com and links to legal and advertising disclosures.
- The site's stated model is financial education with advertising and possible affiliate or sponsored recommendations.
- Hosted on AS14618 (AMAZON-AES - Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M01 (DV), valid to 2027-02-02.

What to Verify Next

For institutional engagement, confirm any applicable advertising, affiliate, or financial-content obligations and validate the stated MediaForce.com relationship through the site's legal pages and an independent corporate source. Where a specific regulated recommendation or product is later promoted, verify the relevant provider's authorization directly with the applicable regulator.

- The homepage provides Terms of Service, Privacy Policy, Advertiser Disclosure, and “How We Rank” materials.
- The analyzed page presents no direct financial-product transaction or funds-handling workflow.
- No broker or financial-services entity was matched in the available third-party context.

Summary Verdict

HealthyWallet presents as a legitimate, established informational website with a high-trust posture and no observed scam, phishing, or impersonation indicators. Normal interaction, including account login where applicable and standard site use, is appropriate.

Infrastructure Integrity

The site is hosted on Amazon infrastructure and uses a valid domain-validated TLS certificate issued by Amazon RSA 2048 M01. These controls support transport security and operational resilience, but they are mitigating infrastructure signals rather than independent proof of legitimacy.

Closing Assessment

Standard browsing and account interaction are appropriate, with ordinary organizational diligence applied to any future commercial or regulated offering promoted through the site.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of healthywallet.co.

- The request stayed on healthywallet.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-52.net, across 4 name servers. NOTED
- The registration is paid up to 2028-01-12. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about healthywallet.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
