- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the French online-banking platform of Hello bank!, presented as BNP Paribas's digital bank and designed to acquire and serve retail customers through online accounts and related financial services.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other contradictory signals were observed. The consistent BNP Paribas identity, long operating history, substantial archival continuity, established traffic footprint, and clean external threat reputation support the conclusion that this is the legitimate Hello bank! website rather than an imitation.

- The homepage consistently identifies Hello bank! as BNP Paribas's online bank; automated page analysis found no suspected brand impersonation.
- The domain was registered in 2012 and is approximately 13.94 years old; its registrar is NAMESHIELD.
- The web archive contains 411 snapshots spanning 2013–2026, representing 14 years of tracked history, with no detected suspicious repurposing or semantic drift.
- External threat checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported infrastructure abuse, and a global traffic rank of 56,631.

Regulatory Verification Notes

The homepage presents a conventional banking model encompassing deposit accounts, payment cards, savings and brokerage services, personal and mortgage credit, insurance, cashback, account switching, and mobile banking. It provides extensive offer conditions and financial-risk disclosures and identifies BNP Paribas as the operating institution. The supplied page evidence does not expose a specific license or registration number, so that particular disclosure remains a minor verification point rather than evidence of illegitimacy; no adverse broker-reputation match was identified.

- The homepage provides detailed pricing, eligibility conditions, legal references, promotional conditions, and financial-risk disclosures.
- The homepage links to ORIAS, providing a relevant external route for checking applicable intermediary registrations.
- The site's TLS certificate is Extended Validation, issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 to BNP PARIBAS SA and valid until 2026-09-01.

- The assessed homepage contained no sensitive embedded form, hidden form, or form submitting data to an untrusted destination.

What to Verify Next

For formal onboarding or procurement records, the BNP Paribas legal entity and any activity-specific authorization should be matched against the relevant official French registry. The applicable account tariff, deposit-protection terms, investment-risk disclosures, eligibility rules, and promotional conditions should also be retained and reviewed for the particular service being obtained. Official contact channels may be confirmed independently where enhanced assurance is required.

- The homepage advertises an acquisition incentive of up to €300, subject to conditions and an offer deadline of 10 August 2026.
- The homepage provides separate customer journeys for individual, joint, youth, and professional offerings, making product-specific contractual review necessary.
- The site provides dedicated routes for becoming a customer, tracking an application, and accessing an existing account.

Summary Verdict

The website is a legitimate, established, and trustworthy digital-banking presence. Its institutional identity, historical continuity, authoritative certificate binding, mature content, clean reputation, and benign observed behavior converge without contradictory signals. Normal interaction, including account login and standard banking use, is appropriate.

Infrastructure Integrity

The website is delivered through Akamai's CDN/WAF, with the observed address belonging to an edge server rather than an exposed origin. This reduces direct infrastructure exposure and is a meaningful protective control, although infrastructure protection is not independently proof of legitimacy.

- The site was served from AS16625, operated by Akamai Technologies, Inc., using observed edge address 104.102.46.44.
- All observed addresses were classified as Akamai CDN edge infrastructure; no origin-server candidate was exposed during the assessment.

Closing Assessment

Prospective customers may proceed with normal account access and standard use, applying the ordinary care expected for online banking and retaining relevant contractual records for material transactions.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hellobank.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
