

Is hellonariyal.com a scam? TrustSniffer's high-risk assessment: 0/100

hellonariyal.com

Verdict

0

OUT OF 100

CRITICAL RISK

hellonariyal.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Hello Nariyal, a Kerala-based coconut-climbing workforce and training provider offering services, branches, testimonials and franchise opportunities. Page contains contact info, phone numbers, emails, branch listings, blog/news items and a YouTube video link.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What hellonariyal.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Hello Nariyal is a Kerala-based local service website presenting coconut-climbing services, coconut-plucker training, branch information, testimonials, and franchise opportunities, with the apparent business model of arranging agricultural labor, training workers, and selling related services or appointments.

Scam/Impersonation Risk

No identity contradiction, brand impersonation, or phishing form was observed in the reviewed site content. However, the domain is subject to a confirmed blacklist finding, with malicious and suspicious detections reported by multiple external security providers, including Fortinet and Sophos. This conflict is materially more significant than the otherwise benign presentation of the homepage: the site describes an ordinary local-service business, and its observed pages contain no login form, sensitive submission form, wallet connection, or other obvious abuse mechanism, but the external detections create a clear risk for sensitive interaction. The appropriate posture is therefore to treat the website as potentially compromised, misclassified, or unsafe for credentials, payments, or other high-impact activity until the contradiction is independently resolved.

EVIDENCE

- External reputation telemetry recorded 14 malicious and 2 suspicious detections among 21 evaluated results; Fortinet and Sophos were flagged.
- The homepage was captured successfully with HTTP status 200 and presented a local-service profile; behavioral testing found no login form, hidden sensitive form, wallet connection, or clipboard-hijacking activity.
- The domain was registered on 2022-12-10 at 17:35:22 UTC and is approximately 3.69 years old.

Regulatory Verification Notes

The site's stated corporate connection and founder information provide a plausible business explanation, but the real-world operator remains only likely rather than independently verified. The reviewed content does not present a license claim, licensing authority, or license number; for a local labor, training, or franchise business this is a disclosure and verification gap rather than proof of fraud. Any franchise or training engagement should therefore be assessed against the applicable Indian corporate, consumer-protection, employment, and local commercial requirements. The domain is registered through PDR Ltd. d/b/a PublicDomainRegistry.com, and its transport encryption is valid, but these technical or administrative facts do not validate the operator or resolve the external security findings.

EVIDENCE

- The homepage identifies Hello Nariyal as a subsidiary of MSP OXY SOLUTION & TRAINING PVT LTD and names Shri P. Mohandas as founder.
- The reviewed business and franchise content contains no stated license authority or license number.
- Hosted on AS46606 (UNIFIEDLAYER-AS-1 - Unified Layer, US).
- TLS certificate issued by YR1 (DV), valid to 2026-11-08 23:49:37 UTC.
- Registrar: PDR Ltd. d/b/a PublicDomainRegistry.com.

What to Verify Next

Before any sensitive engagement, an independent party should confirm that the named company exists in the relevant Indian corporate registry and that the person or organization offering services or franchises is authorized to act for it. Franchise terms, refund obligations, service-delivery commitments, and payment instructions should be obtained in a formally attributable document and checked through independently sourced contact channels rather than relying solely on the website. Security teams should also seek a fresh domain and file-reputation review before permitting access from enterprise networks.

EVIDENCE

- The homepage, About content, and franchise material provide the principal identity and business claims requiring independent confirmation.
- The Contact page provides the channels that should be validated through an offline or independently sourced route.
- The site has no sensitive web form, so any request for credentials, payment, or identity documents received through other channels should be treated as a separate verification event.

Summary Verdict

The overall posture is **critical trust risk** because confirmed external security contradictions outweigh the site's coherent local-business presentation and technically functional delivery. Identity linkage is plausible but not proven, and the available evidence does not support treating the website as suitable for sensitive interaction.

Infrastructure Integrity

No CDN or WAF was detected, and the site resolves to one likely origin IP rather than a separated protective edge. This provides limited infrastructure mitigation and does not offset the external reputation risk.

Closing Assessment

Restrict interaction to non-sensitive, read-only review unless independent organizational, commercial, and security validation has resolved the domain's reputation contradiction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hellonariyal.com.

- The request stayed on hellonariyal.com. It was not redirected to another domain. CLEAR

- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The registration is paid up to 2026-12-10. NOTED
- The earliest public archive of this site is from 2023-03-19. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hellonariyal.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
