

Is helpdesk09-26.com a scam? TrustSniffer's high-risk assessment: 0/100

helpdesk09-26.com

Verdict

0

OUT OF 100

CRITICAL RISK

helpdesk09-26.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

The HTML contains no head metadata and an empty body. No links, forms, or content to analyze.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What helpdesk09-26.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an effectively blank web endpoint at helpdesk09-26.com: the homepage presents no visible text, branding, links, forms, metadata, or stated business model, leaving its apparent purpose and intended operator unestablished.

Scam/Impersonation Risk

The site presents a **critical interaction risk**. A confirmed external blacklist hit is recorded, together with suspicious external detections, including a Tier-1 security-vendor detection. These signals materially outweigh the absence of malicious forms or active external behavior during the limited page inspection. No distinct identity contradiction or page-level brand impersonation was observed, but the blank homepage provides no content capable of establishing legitimacy, and the domain is newly registered. Sensitive actions—including login, credential submission, financial activity, or downloads—should not be performed on the basis of the current evidence.

EVIDENCE

- The homepage returned an empty body with no links, forms, text, metadata, or identifiable business content.
- External reputation results record a confirmed blacklist hit and two suspicious detections; one Tier-1 security vendor also flagged the domain.
- The domain was registered in 2026 and is approximately 0.01 years old.

Regulatory Verification Notes

No operating entity, regulated activity, licence, registration number, terms, privacy disclosure, or other legal identity information is visible on the available homepage. This is a substantial transparency gap rather than proof of a specific offence, but the operator's real-world identity remains unverified. The registrar is Dominet (HK) Limited. Transport encryption is present, although a domain-validated certificate confirms control of the domain rather than the identity or regulatory status of the operator.

EVIDENCE

- The homepage contains no legal, ownership, licensing, or regulatory disclosure.
- Registration telemetry identifies Dominet (HK) Limited as registrar, with creation date 2026-09-17T10:38:43Z and expiration date 2027-09-17T10:38:43Z.
- The site is served on AS13335, Cloudflare, Inc.
- The TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-12-16.

What to Verify Next

Before any sensitive interaction, an independent source should confirm the operator's legal name, contact channels, and any claimed authorisation with the relevant corporate or financial-services registry. If the site later presents a service or payment request, its terms, refund or dispute process, and beneficiary details should be checked independently rather than through the site itself. The domain should also be re-evaluated only after the blacklist status and the operator's identity have been independently resolved.

EVIDENCE

- The homepage currently provides no business description against which an operator or regulatory claim can be matched.
- No login, payment, wallet, or other sensitive form was observed in the captured page.
- Independent identity and licensing confirmation is therefore required before treating any future content or request from the domain as authoritative.

Summary Verdict

The available evidence supports a **critical-risk posture for sensitive interaction**. The site cannot presently establish who operates it or what service it provides, while the confirmed blacklist signal creates a material contradiction to ordinary trust assumptions. Read-only observation is the only proportionate use supported by the evidence.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge addresses rather than an identified origin server. This reduces direct origin exposure but is only a mitigating infrastructure characteristic; it does not offset the external reputation concern or establish legitimacy.

Closing Assessment

The domain should not be used for login, credential handling, financial activity, or other sensitive interaction unless independent identity and reputation checks produce clear, credible resolution.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of helpdesk09-26.com.

- The request stayed on helpdesk09-26.com. It was not redirected to another domain. CLEAR
- Registration is published under Dominet (HK) Limited. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-17. NOTED
- The earliest public archive of this site is from 2026-09-17. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about helpdesk09-26.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
