

Is henvillegroup.com a scam? TrustSniffer's high-risk assessment: 0/100

henvillegroup.com

Verdict

0

OUT OF 100

CRITICAL RISK

henvillegroup.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Short informational homepage listing group entities and basic links (Contact, Privacy Policy). No forms, payment flows, or financial promises present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	9 flagged it VirusTotal	RISK

The page as captured

<https://henvillegroup.com/>

What henvillegroup.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Henville Group is a short corporate and organizational website presenting links to Henville Group, Peak Solutions, LLC, Caribbean Foundation For Children, and "We Dare To Teach," with basic Contact and Privacy Policy navigation; its apparent purpose is informational branding for a group of related entities rather than ecommerce or financial solicitation.

Scam/Impersonation Risk

The site does not display a login form, payment flow, financial offer, or overt impersonation indicators, and the homepage content is consistent with a corporate information page. However, this benign presentation is outweighed by a **confirmed blacklist status** and multiple external malicious detections, including a major security vendor's finding; the result is a material contradiction between the site's limited public-facing content and its external threat reputation. No conflicting legal-entity names or direct brand-impersonation indicators were observed, but the available evidence supports treating sensitive interaction with the site as unsafe.

EVIDENCE

- Homepage: 283 characters of visible text, with no forms, login functionality, payment flow, or financial promises.
- External reputation telemetry: 9 malicious and 1 suspicious detections among 15 evaluated results; blacklist status confirmed by two sources.
- Browser behavior: 2 external XHR requests and 2 external POST requests were observed as non-whitelisted; no hidden forms, wallet connection, credential collection, clipboard hijacking, or cloaking was detected.

Regulatory Verification Notes

The Contact and Privacy Policy links, together with references to Henville Group, Peak Solutions, LLC, and Caribbean Foundation For Children, provide limited organizational context but do not independently verify the operating identity. The site does not present a claimed license, registration number, or regulated-service disclosure; because the visible business model is informational and no financial product is advertised, this is principally a transparency and verification gap rather than standalone evidence of fraud. The domain is long-established and uses a mainstream registrar, while the available identity evidence remains insufficient to connect the website conclusively to a verified real-world operator.

EVIDENCE

- Registration record: Registered 2014-08-29 and approximately 11.99 years old; registrar listed as GoDaddy.com, LLC, with expiration on 2027-08-29.
- Hosting telemetry: Served from AS209242, CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Transport security: TLS certificate issued by WE1 with DV validation, valid to 2026-10-15T00:18:12+00:00.
- Homepage and linked pages: Entity names, Contact, and Privacy Policy are present, but no license authority or license number is stated.

What to Verify Next

Before any sensitive interaction, an organization considering engagement should independently confirm that Henville Group, Peak Solutions, LLC, and Caribbean Foundation For Children are real and related entities through authoritative corporate or charitable registries applicable to their stated jurisdictions. Contact details and any proposed service relationship should be validated through an independently sourced channel, and any request for credentials, payment, document submission, or software installation should be matched to a separately confirmed business purpose and contract.

EVIDENCE

- Homepage: The site identifies three group-related entities but supplies only minimal descriptive information.
- Contact and Privacy Policy pages: These are the principal supporting pages identified for organizational and data-handling information.
- Site behavior: No sensitive form or password-external form was detected during two successful behavioral runs.

Summary Verdict

The overall posture is **critical trust with elevated sensitive-interaction risk**. The site's corporate presentation and sound basic transport controls do not offset the confirmed external threat detections, and the operator's real-world identity is not independently verified. Read-only observation is the only proportionate use supported by the evidence.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure of the hosting environment, but it is not proof of legitimacy. The observed address was a CDN edge address, and the origin server was not observable in this analysis.

EVIDENCE

- CDN/WAF: Cloudflare protection detected; hosting provider identified as CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- Network endpoint: Edge IP 160.153.0.74 observed on AS209242; 1 unique IP and 0 likely origin candidates were identified.

Closing Assessment

Sensitive actions should not proceed unless the organization and the specific engagement have been validated through independent, authoritative channels; absent that validation, activity should remain strictly non-interactive and read-only.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of henvillegroup.com.

- The request stayed on henvillegroup.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-08-29. [NOTED](#)
- The earliest public archive of this site is from 2018-08-07. [CLEAR](#)
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [henvillegroup.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
