Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the corporate website of Hetrios Terraplanagem, Engenharias e Construções, a regional Brazilian construction and engineering company based in Rio do Campo, Santa Catarina. It presents the company's civil-works capabilities, including earthmoving, infrastructure, construction, paving, drainage, agricultural work, equipment, and completed projects, with contact and newsletter facilities intended to support commercial enquiries.

Scam/Impersonation Risk

No contradictions were observed. The site presents a conventional business-to-business model rather than financial, investment, credential-harvesting, cryptocurrency, or other abuse-oriented mechanics. Its company description, service categories, equipment information, project section, contact facilities, and linked Facebook presence are internally consistent, while available external checks recorded no malicious or suspicious findings and no suspected brand impersonation. The domain's long registration history further supports continuity, although it does not independently prove the operator's real-world identity.

EVIDENCE

- The homepage and “Quem Somos” page describe a regional construction and engineering firm operating from Rio do Campo, Santa Catarina.
- The “Atuação,” “Equipamentos,” and “Obras” pages present construction services, machinery, and projects without detected phishing, wallet, payment-harvesting, or hidden-form indicators.
- The domain was registered on 2014-10-18 and is approximately 11.85 years old.
- Available external reputation checks recorded 0 malicious findings, 0 suspicious findings, and 0 AbuseIPDB reports; no brand-impersonation signal was detected.

Regulatory Verification Notes

The available content is consistent with a small regional contractor, but the operator’s identity is not independently verified by the evidence supplied. The site does not present a licensing authority or license number; for this type of construction business, that is a regulatory and commercial verification point rather than evidence of a scam. The visible company and contact information provide a useful basis for independent confirmation, while the absence of detected third-party broker matching offers contextual reassurance but is not a licensing determination.

EVIDENCE

- The “Quem Somos” page identifies Hetrios Terraplanagem, Engenharia e Construções and describes its location and operating scope.
- The “Contato” page provides a business address in Rio do Campo/SC, telephone numbers, and a corporate contact channel.
- The site’s transport encryption uses a DV certificate issued by YR1, valid through 2026-10-01T20:13:40+00:00.
- Hosting resolves through AS13878, identified as Scala Data Centers, BR.

What to Verify Next

Before a contract, advance payment, or exchange of sensitive information, independently confirm the company’s legal identity and construction-sector standing through the relevant Brazilian commercial, municipal, or professional registry. Confirm that quotations, project references, contracting authority, invoicing details, and payment-account ownership correspond to the independently confirmed entity. Contact channels should also be validated through an independent route, and any applicable contractual cancellation, warranty, or payment-protection terms should be documented before funds or credentials are provided.

EVIDENCE

- The site provides dedicated “Quem Somos,” “Atuação,” “Obras,” and “Contato” pages that can be compared with independently obtained business records.
- The only detected form is a newsletter email-registration form; no login form or sensitive submission workflow was identified.
- Two successful page-behavior runs returned stable HTTP 200 responses with 0 external XMLHttpRequest or fetch activity.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate corporate website. This classification supports normal browsing and ordinary business engagement, but it should not be interpreted as independent proof of the real-world operator’s identity.

Infrastructure Integrity

The site is directly hosted through AS13878, Scala Data Centers, in Brazil, with no CDN or WAF edge layer identified and one resolved hosting address. The infrastructure presents a straightforward, attributable hosting posture; the valid transport certificate is a mitigating security control, but infrastructure protection alone is not proof of legitimacy.

Closing Assessment

Ordinary commercial engagement is proportionate to the assessed posture, subject to independent confirmation of the counterparty and the applicable payment and contractual protections before any credential or payment interaction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hetrios.com.br.

- The request stayed on hetrios.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by umbler.com, across 4 name servers. NOTED
- The registration is paid up to 2026-10-18. NOTED
- The earliest public archive of this site is from 2016-03-14. CLEAR
- It is hosted on AS13878, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hetrios.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
