

Is hhaexchange.com legit? TrustSniffer's high-trust assessment: 100/100

hhaexchange.com

Verdict

100

OUT OF 100

HIGH TRUST

hhaexchange.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

HHAeXchange presents an enterprise healthcare software platform connecting homecare providers, payers, and caregivers. The page describes scheduling, caregiver applications, EVV compliance, billing, claims, analytics, network management, and support resources, with demo requests serving as the primary conversion action.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

HHAeXchange is an enterprise healthcare software website serving homecare providers, payers, caregivers, managed-care organizations, and state Medicaid programs through operational, compliance, care-management, and revenue-cycle tools, with account access, support resources, and demonstration requests supporting its software-service model.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The site's clearly defined healthcare-software purpose, long operating history, stable archival presence, established traffic footprint, and consistent corporate content strongly support an authentic and mature business identity. Interactive testing also found no cloaking, hidden forms, credential forwarding, or other behavior indicative of impersonation.

- The domain record shows registration through GoDaddy.com, LLC on 19 February 2007, making it approximately 19.45 years old; registration extends to 5 April 2028.
- The domain's archival record contains 313 snapshots from 2 November 2007 through 8 July 2026, spanning 20 tracked years with no gap exceeding one year.
- The homepage identifies the site as "Homecare Software for Providers & Payers | HHAeXchange" and presents a coherent corporate SaaS offering rather than an unrelated or deceptive landing page.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, and an established global traffic rank of 47,212.

Regulatory Verification Notes

The website presents operational capabilities relevant to regulated healthcare environments, including electronic visit verification, state-sponsored EVV programs, billing and claims, program-integrity tools, and services for Medicaid programs. The supplied homepage content also exposes company, leadership, technology-and-security standards, memberships, support, and state information pathways. No specific statutory license, corporate registration number, or regulator-issued authorization was established from the supplied page evidence; this is a limited disclosure-verification point, not an indication of fraud, and the absence of a broker-database match has no meaningful bearing on a healthcare SaaS provider.

- The homepage describes services for HCBS providers, managed-care organizations, state Medicaid programs, and caregivers, including EVV compliance, scheduling, clinical tools, payroll, billing, claims, and

network management.

- The homepage navigation includes About, Leadership, Technology & Security Standards, Memberships, Contact Support, and dedicated state information centers.
- No financial-services license claim, named licensing authority, or license number appears in the supplied website content.
- The homepage contained no sensitive form, hidden form, or form submitting information to an untrusted destination.

What to Verify Next

Enterprise onboarding should include confirmation of the contracting legal entity and authorized signatory through procurement documentation. Security and compliance review should obtain the applicable assurance reports, data-processing terms, privacy documentation, incident-notification commitments, and evidence supporting any healthcare or state-program compliance representations. Organizations intending to exchange protected or payment-related information should also validate role-based access, integration controls, data residency, retention, subcontractor governance, and the official support-escalation process.

- The homepage provides dedicated Technology & Security Standards and support resources that can serve as starting points for due-diligence requests.
- The site advertises integrations, a connected-tools marketplace, caregiver mobile functionality, billing and payment workflows, and business-intelligence capabilities, creating concrete areas for access-control and data-flow review.
- The site's stated customer base includes healthcare providers, payers, managed-care organizations, and state Medicaid programs, making contractual security and compliance evidence material to enterprise adoption.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, historical continuity, substantive corporate presentation, clean threat reputation, and stable observed behavior converge on a high-confidence assessment suitable for normal interaction, including account login and standard platform use.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF environment, with two observed edge addresses and one potential origin candidate. This mainstream protective architecture reduces direct exposure and provides a meaningful security mitigation, although infrastructure protection is not independently proof of business legitimacy. Transport encryption was valid and appropriately configured at the time of observation.

- The hosting infrastructure is served from AS209242, operated by CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- The site uses a WE1-issued domain-validated TLS certificate, valid until 14 September 2026.
- Infrastructure observation identified three addresses: two Cloudflare edge addresses and one potential origin candidate.

Closing Assessment

Prospective users may proceed with normal website and account use; institutional adoption should follow the organization's standard vendor-onboarding, contractual, privacy, and security-assurance processes.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hhaexchange.com.

- The request stayed on hhaexchange.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by dnsmadeeasy.com, across 5 name servers. NOTED
- The registration is paid up to 2028-04-05. CLEAR
- The earliest public archive of this site is from 2007-11-02. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hhaexchange.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
