Full analysis

Overview

This website is the institutional portal for Late Mrs. Housabai Homoeopathic Medical College & Hospital in Nimshirgaon, Maharashtra, presenting information on the college, BHMS education, departments, admissions, academic activities, infrastructure, hospital services, student resources, research, notices, and institutional contacts. Its apparent purpose is to support education, admissions, and associated hospital services rather than direct online commerce.

Scam/Impersonation Risk

No contradictions were observed, including no confirmed phishing, impersonation, or malicious-site indicators. The homepage and institutional menus are consistent with an educational and healthcare organization, with no login form, sensitive submission form, wallet functionality, or suspicious browser behavior identified. A naming-similarity signal associated the site's abbreviated branding with hm.com, but this did not result in a confirmed impersonation finding; the homepage's missing structured metadata and limited search-description content are

presentation weaknesses rather than evidence of fraud. The available evidence therefore supports an apparently legitimate, low-risk institutional website, while its real-world operator identity remains independently unverified.

EVIDENCE

- The homepage presents the college and hospital at Sangli-Kolhapur Road, Nimshirgaon, Maharashtra, with institutional, academic, admissions, and hospital-service navigation.
- The site's interactive assessment recorded no login form, hidden form, password submission, wallet connection, clipboard hijacking, cloaking, or suspicious inline scripts.
- The domain was registered on 2017-06-11 and is approximately 9.2 years old.
- Historical records contain 1,283 archive snapshots spanning 2019-07-04 to 2026-04-21, covering 8 years.

Regulatory Verification Notes

The site provides institutional identity material through its About Us area, including references to a Trust Registration Certificate and a No Object Certificate, and links to sector or public bodies including MUHS, NCH, and AYUSH. These on-page references support an evidence-consistent institutional presentation but do not independently establish the validity of the documents or any current authorization. The site does not state a verified license number or independently confirmed regulatory status, so authorization and disclosure remain matters for ordinary external verification rather than indicators of a scam. A separate broker-reputation check produced no match, which is contextual reputational support and not a licensing determination. Available reputation screening found no malicious or suspicious detections.

EVIDENCE

- The registration record lists Endurance International Group India Private Limited as registrar and Biyani Technologies as the registrant organization.
- The site is served from AS45815, HOSTCOIN-AS-IN-AP - ESDS Software Solution Limited., IN.
- Transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-10-09T23:59:59+00:00.
- The About Us and institutional-information pages contain the Trust Registration Certificate and No Object Certificate references, while the site links to MUHS, NCH, AYUSH, and related public-sector resources.

What to Verify Next

Before credential or payment interactions connected with admissions or hospital services, the institution's identity and official contact channels should be confirmed through independently published sources. The referenced trust and institutional documents should be checked with the relevant issuing or sector authority, and any fee recipient, refund terms, and payment-protection arrangements should be confirmed before funds are transferred.

EVIDENCE

- The Admissions and Notices pages identify the areas where enrollment information and related communications are presented.
- The About Us pages identify the trust and institutional documents that can be checked through independent official channels.
- The Contact and Admissions pages provide the appropriate locations for confirming the official communication route and fee instructions.
- Hospital-service pages describe the areas requiring confirmation of service terms and payment arrangements before transaction activity.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate institutional website. The assessment supports normal informational use and routine site interaction, but it does not independently prove the real-world identity of the operator.

Infrastructure Integrity

The site resolves to a single likely origin address and does not use a detected CDN or WAF edge layer. Direct hosting is not, by itself, adverse; the resolved infrastructure provides a clear hosting path, while the site's valid transport encryption remains a mitigating technical control.

Closing Assessment

Ordinary use is proportionate, with independent confirmation of institutional identity, applicable terms, and payment protections appropriate before credentials or payments are submitted.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hhmc.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
