Full analysis

Overview

Himalayan Envpro Treks & Expedition is a Nepal-focused trekking and adventure-tour website presenting guided treks, cultural tours, peak-climbing services, destinations, travel information, package prices, durations, and booking contact details for customers seeking organized travel experiences.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional trekking operator and does not show a login form, credential-harvesting mechanism, wallet connection, hidden sensitive form, or detected brand impersonation. However, this benign page presentation is outweighed by confirmed external threat detections and a confirmed blacklist status, creating a material contradiction between the site's travel-service presentation and its external reputation. The available evidence does not establish that the listed trekking business is the operator of the domain, so sensitive interactions, payments, and submission of personal information should be treated as elevated-risk activities.

EVIDENCE

- The homepage identifies Himalayan Envpro Treks & Expedition and lists trekking and cultural-tour packages, including prices, durations, and booking-oriented information.
- The observed site behavior recorded no login form, hidden form, sensitive form, external submission destination, wallet connection, or suspicious inline script.
- External reputation checks recorded 4 malicious detections and a confirmed blacklist hit; no phishing or brand-impersonation finding was recorded in the page analysis.
- The domain was registered on 2017-11-26 and is approximately 8.74 years old; archival records show 28 snapshots from 2018-07-23 through 2026-05-11, covering 9 years.

Regulatory Verification Notes

The website presents a commercial travel business and publishes package pricing and contact details, but the supplied pages do not show a verified license, registration number, or clearly documented legal operator. Ownership and governance disclosures are therefore insufficient for independently connecting the website to a real-world entity. This is a verification gap rather than a standalone finding of fraud, but it is significant when considered alongside the confirmed external reputation concerns. No matching broker-reputation record was identified in the supplied third-party context.

EVIDENCE

- The homepage and travel-information pages describe guided treks, tours, destinations, and direct customer bookings but do not provide a verified licensing authority or license number.
- The contact and company-information content supplies business contact details but does not independently verify the legal entity operating the domain.

What to Verify Next

Before any booking or payment, the operator's legal name, Nepalese business or tourism registration, and authorization to sell the advertised services should be confirmed through the relevant official registry or tourism authority. Package inclusions, cancellation terms, refund arrangements, insurance responsibilities, and the identity of the receiving payment account should be confirmed in writing. Contact details should also be validated through an independent channel, and any payment should use a method offering meaningful dispute or chargeback protection.

EVIDENCE

- The tour and trek pages provide specific prices and durations that can be compared against a written quotation and contractual itinerary.
- The contact and travel-information pages provide the starting points for validating the operator, booking terms, and payment arrangements independently.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site's coherent travel content and stable technical presentation do not overcome the confirmed external reputation contradictions or the lack of independently verified operator identity.

Infrastructure Integrity

The site resolves directly to a likely origin IP rather than through a detected CDN or WAF, so there is no identified edge-layer mitigation for origin exposure. It is hosted by WHG-SGP – WHG Hosting Services Ltd, GB, on AS204800; transport encryption is provided by a domain-validated certificate issued by YR2, valid through 2026-10-01. These controls support basic transport and hosting continuity but do not establish business legitimacy or offset the reputation findings.

EVIDENCE

- Hosting infrastructure: AS204800, WHG-SGP – WHG Hosting Services Ltd, GB; resolved IP 103.138.189.197.
- CDN/WAF posture: no CDN detected; 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate: issuer YR2, validation level DV, valid to 2026-10-01T07:11:50+00:00.

Closing Assessment

Prospective users should restrict activity to ordinary, non-sensitive browsing until the operator, contractual terms, and payment protections have been independently validated; high-value commitments should be deferred if those checks cannot be completed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about himalayanenvpro.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
