Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

HOCMAI is a Vietnamese online education platform that presents structured learning services, examination preparation, teacher-led instruction, study resources, and digital access features for students.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent educational identity under the HOCMAI name, with course information, study content, student-support functions, and ordinary login and registration workflows; no phishing, impersonation, hidden-form, wallet, cloaking, or malicious-script indicators were identified. External reputation checks were clean, supporting the conclusion that the domain is not exhibiting a known abuse pattern.

EVIDENCE

- The homepage is titled “Học trực tuyến - Hệ thống giáo dục HOCMAI” and contains substantial education-related content, including course announcements, examination tools, teacher resources, and student support.
- External reputation telemetry recorded 0 malicious detections, 0 suspicious detections, no external blacklist match, and a Tranco rank of 55896.
- Behavioral testing recorded 0 hidden forms, 0 password submissions to external forms, 0 wallet-provider detections, 0 clipboard-write events, and no cloaking classification.

Regulatory Verification Notes

The site operates as an education and course provider rather than presenting itself as a financial or investment service. Its commercial model includes paid courses, live classes, study materials, app access, and related subscription or course-access arrangements. The available site content does not state a licensing authority or license number; this is a regulatory-transparency point for commercial diligence, not evidence of fraud. The domain also had no match in the available broker-reputation context, although that signal is not a legal or licensing determination.

EVIDENCE

- The homepage identifies education services and provides navigation for courses, live classes, examination preparation, study libraries, and registration guidance.
- The available page content contains no stated license authority or license number.
- Page-authority assessment classified the site’s authority as high, while the visible business model was classified as established education or courses with low page-level risk.

What to Verify Next

For institutional procurement or material payments, confirm any business-registration or education-sector requirements applicable to the specific service with the relevant Vietnamese authority. Review the applicable enrollment, payment, cancellation, and refund terms before a significant purchase. The official app publisher and support channels should also be reconciled with the website before installing software or escalating account issues through an alternate channel.

EVIDENCE

- The homepage provides a “Hướng dẫn Đăng ký học” registration-guidance route that can be used to trace enrollment and payment terms.
- The homepage exposes “Hỗ trợ” and a telephone contact call-to-action, providing an official channel for confirming service details.
- The homepage includes an app-download call-to-action, creating a specific point for verifying the publisher and distribution route before installation.

Summary Verdict

HOCMAI presents a **high-trust posture** consistent with a legitimate, established education provider. Normal interaction, including account login and standard use, is appropriate, with the overall assessment supported by convergent content, behavioral, reputation, authority, and transport-security signals.

Infrastructure Integrity

The website is protected by Cloudflare CDN and WAF infrastructure. All observed addresses were Cloudflare edge addresses, with no origin candidate identified in the infrastructure view; this reduces direct exposure of the hosting environment but is treated only as a mitigating security control, not as proof of legitimacy.

EVIDENCE

- Served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Observed Cloudflare edge addresses included 104.26.4.172, 104.26.5.172, 172.67.71.140, 2606:4700:20::681a:4ac, and two additional edge addresses, with 6 unique observed IPs and 0 likely origin IPs.
- TLS certificate issued by WE1 using DV validation, valid to 2026-11-05T23:03:51+00:00.

Closing Assessment

Prospective users may proceed with normal account and service interactions; for material purchases or institutional engagement, retain transaction records and complete the proportionate commercial checks outlined above.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hocmai.vn.

- The request stayed on hocmai.vn. It was not redirected to another domain. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hocmai.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
