Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Homebank is a Kazakhstan-based digital banking and payments service presenting digital cards, transfers, QR payments, multicurrency support, cash withdrawal, merchant rewards, and fee-free payment offers for consumers.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent banking identity linked to Halyk Bank Kazakhstan, with a physical address, call-center number, defined services, and no detected phishing, malware, impersonation, or suspicious behavioral indicators. The site's long-running historical presence and clean external reputation further support continuity rather than a recently constructed impersonation.

- The homepage identifies Halyk Bank Kazakhstan, provides an Almaty address and call-center number, and presents a consistent banking-services model.
- The domain is recorded as 24.843 years old; archival coverage contains 1,281 snapshots from 2001-09-27 through 2026-07-29, spanning 26 years.
- External reputation checks recorded zero malicious findings, zero suspicious findings, and no blacklist or phishing hit.

Regulatory Verification Notes

The homepage displays a banking and securities-market license reference issued by Kazakhstan's Agency for Regulation and Development of the Financial Market, alongside the Halyk Bank legal identity and address. The supplied evidence does not independently verify that license with the regulator, so confirmation remains a routine regulatory-check item rather than an indication of misconduct. The service's stated banking model and established identity are consistent with a legitimate financial institution.

- The homepage displays license number 1.2.47/230/38/1, dated 23 June 2023, and attributes it to Kazakhstan's Agency for Regulation and Development of the Financial Market.
- The site is hosted on AS39433, KAZCOMBANK-AS - Kazakhstan Halyk Bank JSC, KZ.
- The site's OV TLS certificate was issued by GeoTrust TLS RSA CA G1 for "Halyk Savings Bank of Kazakhstan", JSC and is valid through 2027-01-06.

What to Verify Next

A prospective institution should confirm the displayed license reference directly against the relevant Kazakhstan regulatory register and validate the service's official contact and application channels through an independently sourced Halyk Bank communication route. Standard account use and login are appropriate within the verified official service environment.

- The homepage supplies the legal entity name, physical address, license reference, and 7111 contact-center number for independent comparison.
- The homepage identifies the service as Homebank and links its user-service terms and account-deletion security guidance.

Summary Verdict

Homebank presents as a legitimate, established, high-trust banking service with strong identity continuity, coherent business purpose, clean reputation signals, and no observed scam or impersonation contradictions. Normal interaction, including account login and standard account actions, is appropriate.

Infrastructure Integrity

The site resolves to a single likely origin address in Kazakhstan and is served directly through Halyk Bank’s identified network rather than a CDN or WAF edge. Its OV certificate and institution-matching subject organization provide meaningful transport and identity assurance, while the absence of intermediary protection leaves the origin infrastructure more directly exposed but does not undermine the overall trust assessment.

Closing Assessment

Proceed with normal banking use through the confirmed official service environment, with routine regulatory and contact-channel confirmation appropriate for any regulated financial relationship.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of homebank.kz.

- The request stayed on homebank.kz. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2001-09-27. CLEAR
- It is hosted on KAZCOMBANK-AS, from a server in KZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about homebank.kz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
