Full analysis

Overview

Homedecorbox is an online home-decor storefront presenting product listings for items such as artwork, vases, clocks, kitchen sets, candle holders, and household furnishings, with a conventional retail model based on product sales, checkout, shipping, customer accounts, and newsletter subscriptions.

Scam/Impersonation Risk

No contradictions were observed. The reviewed pages do not indicate brand impersonation, phishing, credential harvesting, cryptocurrency activity, or other deceptive investment behavior. Account functionality is present, but the observed login and signup mechanisms did not use hidden forms or redirect password submission to an untrusted destination. Dynamic page changes and external network activity were observed during interaction testing; these were not accompanied by cloaking, wallet-drainer behavior, clipboard manipulation, or other confirmed abuse indicators, and are more consistent with storefront functionality than with an identified impersonation scheme.

EVIDENCE

- The homepage presents a standard retail catalogue and was assessed with no content-level red flags.
- The account and signup pages contain visible forms without hidden sensitive fields or external password destinations.
- External reputation checks recorded no malicious or suspicious detections, no confirmed blacklist finding, and no broker-dataset match.

Regulatory Verification Notes

The site provides contact information, identifies a company owner on its pages, and publishes shipping, return, and related store policies. The available identity evidence supports a likely connection to a real operating entity, but that connection is not independently verified; on-page disclosure is therefore adequate for an initial retail assessment but not conclusive for higher-value transactions. No regulatory licence claim or registration number is presented in the reviewed material. That is a transparency item for verification rather than evidence of a scam, particularly because the site presents itself as a conventional home-goods retailer rather than a regulated financial service. The domain is established, registered through GoDaddy.com, LLC, and protected by valid domain-validated transport encryption issued by YE2.

EVIDENCE

- Domain registration telemetry: registered 2019-05-02T20:11:13Z; age 7.31 years; expiry 2029-05-02T20:11:13Z; registrar GoDaddy.com, LLC.
- TLS telemetry: issuer YE2; validation level DV; valid to 2026-10-29T10:26:03+00:00.
- The contact and policy pages contain seller contact details, owner information, and shipping/return statements.
- The reviewed pages do not display a regulatory licence claim or licence number.

What to Verify Next

Before a high-value purchase or sensitive account use, independently confirm the legal seller details and applicable consumer-registration requirements through an authoritative registry, and compare the published shipping and return terms with the protections offered by the intended payment method. Contact channels should be confirmed through an independent route, and any account password should be unique to this site.

EVIDENCE

- The contact page supplies the seller's stated contact and ownership information for independent confirmation.
- The shipping and returns pages provide the terms against which fulfilment and refund expectations can be checked.
- The account pages support login, registration, and password recovery, creating a need for standard credential hygiene.

Summary Verdict

Homedecorbox presents as an apparently legitimate small online retailer with a **moderate-trust posture** and no observed scam or impersonation contradictions. The available evidence supports ordinary browsing and routine retail consideration, while the real-world operator connection remains only likely rather than independently established.

Infrastructure Integrity

The site is served through Cloudflare's CDN/WAF infrastructure, which is a mitigating control that reduces direct exposure of the underlying hosting environment; the observed address was a CDN edge address and the origin server was not observable in this analysis.

EVIDENCE

- Hosting telemetry: AS13335, CLOUDFLARENET — Cloudflare, Inc., US; edge address 23.227.38.32; registry ARIN; country CA.

Closing Assessment

Routine interaction may proceed with proportionate care, while independent seller and payment-protection checks should be completed before committing substantial funds or using sensitive account credentials.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page replaced a large part of its own content after loading.
Behaviour in a sandbox rule:BEHAV_DOM_CHANGE_HIGH
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about homedecorbox.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
