Full analysis

Overview

HomeExchange is an established paid travel marketplace that enables members to arrange home-exchange stays internationally through a structured membership model, with the apparent purpose of facilitating trusted accommodation sharing and travel.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent marketplace proposition, identifiable membership mechanics, guarantees, user reviews, and legal information; its content is consistent with a genuine travel service rather than a deceptive acquisition funnel.

- The homepage describes home exchange across 155 countries, direct exchanges, and GuestPoints, with membership pricing and guarantees.
- The homepage contains no detected phishing, impersonation, hidden-form, or deceptive-behavior indicators.
- The domain was registered in 2018 and is approximately 8.12 years old.

Regulatory Verification Notes

The site provides legal information and clearly presents its commercial model as a travel marketplace rather than a financial or regulated investment service. No third-party broker association was identified. Licensing is not presented as a central business claim; for institutional use, the applicable operating entity and consumer-law obligations should therefore be confirmed through the site's legal materials and relevant jurisdictional registers.

- The homepage links to legal information and explains paid membership, guarantees, and premium offerings.
- Hosted on AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- TLS certificate issued by Amazon RSA 2048 M01, domain-validated, valid to 2026-11-04.

What to Verify Next

For procurement, partnership, or other material commercial engagement, confirm the operating legal entity, applicable travel-service obligations, and current membership terms through the site's legal pages and independent jurisdictional registers. Standard users may proceed with normal account and platform use.

- The homepage provides membership pricing, guarantees, reviews, and links to legal information.
- The stated service model and user-facing terms are presented directly within the marketplace experience.

Summary Verdict

The website presents a legitimate, established, and high-trust posture with no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site uses mainstream Amazon hosting infrastructure and a valid domain-validated TLS certificate. This provides a sound transport-security and hosting baseline, while remaining a mitigating technical signal rather than proof of business legitimacy.

- Served from AS16509 (Amazon Technologies Inc., US).
- TLS issuer: Amazon RSA 2048 M01; validation level: DV; expiry: 2026-11-04.

Closing Assessment

Normal account login and standard platform use are appropriate; commercial users should retain ordinary review of contractual and membership terms before material commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about homeexchange.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
