Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is a Brazilian commercial website for HomeHost, presenting subscription-based domain registration, web hosting, VPS and cloud servers, professional email, SSL, backups, and related website services. Its apparent business model is to acquire and retain customers through hosting and domain plans, ancillary technical services, and online account or checkout interactions.

Scam/Impersonation Risk

No scam, phishing, impersonation, or other identity contradictions were observed. The site's homepage presents a coherent hosting and domain-registration business, with no wallet, cryptocurrency, gambling, or deceptive financial-product mechanics identified. Automated interaction did record dynamic inline scripts and substantial page and network changes, but no hidden sensitive forms, wallet-drainer behavior, clipboard manipulation, or malicious reputation findings were present; these observations do not establish an impersonation or scam condition. The domain is long-established, and the available evidence is consistent with an established website, although the real-world operator identity is not independently verified.

EVIDENCE

- Domain registration record: registered 2006-07-16 (~20.08 years old), with expiry recorded as 2029-07-16.
- Homepage analysis found no brand-impersonation indicators, phishing forms, or crypto-related functionality.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing-list match or blacklist finding.

Regulatory Verification Notes

HomeHost appears to operate as a commercial hosting and domain-services provider rather than a business presenting regulated financial products. The registration record names GX INTERNET E WEB HOSTING SERV DE INFORMATICA LTDA, which supports an apparent connection to a real operating entity, but that connection does not independently prove the identity of the website operator. The site does not present a license or registration number relevant to its hosting and domain services; this is a verification and disclosure point, not evidence of a scam. The homepage provides substantive commercial information, including plan pricing from R\$7.90 per month, a stated 99.9% uptime guarantee, more than 150,000 hosted domains, and a 14-day testing and refund policy subject to a domain-registration exception. Those claims should be read as merchant representations until confirmed in the contractual terms.

EVIDENCE

- Hosting telemetry: served from AS262603, GX INTERNET E WEB HOSTING SERV DE INFORMATICA LTDA, Brazil.
- Transport security: TLS certificate issued by YR2, validation level DV, valid to 2026-10-26.
- The homepage identifies hosting, domain, email, VPS/cloud, SSL, backup, and migration services but does not display a licensing or registration number.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the legal entity associated with the service agreement and ensure that the billing entity matches the website and checkout terms. The refund, uptime, renewal, domain-registration, and service-cancellation provisions should be reviewed in the applicable terms before subscription. Payment should use a method offering dispute or chargeback protection, and support channels should be confirmed through an independently sourced route rather than relying solely on page content.

EVIDENCE

- The homepage contains signup/checkout and contact/support forms, making the merchant and payment-flow details relevant to pre-purchase review.
- The published plan materials include guarantee and refund language that should be reconciled with the governing terms before commitment.
- Social links are provided for Twitter, Instagram, Facebook, YouTube, and WhatsApp, offering additional channels for consistency checks.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports ordinary browsing and service consideration, while the operator's real-world identity remains likely rather than independently proven.

Infrastructure Integrity

The site resolves directly to a hosting origin and does not use a detected CDN or WAF edge layer. This provides less protective separation between the public service and its hosting environment, but it is an infrastructure characteristic rather than evidence of malicious activity.

Closing Assessment

Routine site use is proportionate to the assessed posture; independent merchant-identity, contractual, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of homehost.com.br.

- The request stayed on homehost.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 99.113, across 2 name servers. NOTED
- The registration is paid up to 2029-07-16. CLEAR
- It is hosted on AS262603, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about homehost.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
