Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This is an informational healthcare website for Dr Dinesh Sharma Homoeo Clinic in Jaipur, presenting homeopathic treatments for chronic and other conditions, doctor information, health resources, videos, contact details, and consultation-oriented services.

Scam/Impersonation Risk

The site's visible content is consistent with a homeopathic clinic and does not promote financial products, credential-harvesting forms, cryptocurrency activity, or other obvious on-page scam mechanics. However, this benign presentation is outweighed by a material external contradiction: the domain is blacklisted by two external sources, including detections identifying malicious activity, with an additional suspicious detection. The real-world identity of the operator also remains unverified; the available evidence does not establish that the clinic name and published services are independently connected to a verified legal or professional entity. Accordingly, the site should be treated as potentially unsafe for sensitive interaction despite its healthcare-oriented appearance.

EVIDENCE

- The homepage presents “Homeopathic Treatment for Chronic Diseases | Dr Dinesh Sharma Homoeo Clinic,” Jaipur contact details, treatment categories, doctor information, and patient resources.
- External reputation checks recorded 2 malicious and 1 suspicious detections, together with blacklist status from two sources.
- The domain was registered in 2014 and is recorded as approximately 12.48 years old through 2028-02-26.
- Historical records contain 108 archive snapshots spanning 2010–2026, representing 17 years tracked.

Regulatory Verification Notes

The About, doctor-profile, treatment, and contact content describes a clinic and consultation service, but the supplied site material does not disclose a license number, licensing authority, or independently verifiable professional registration. That is a regulatory-transparency gap rather than proof of fraud, but it is significant because the site makes health-treatment claims across conditions including diabetes, thyroid disorders, infertility, kidney disease, hypertension, addiction, and neurological conditions. The absence of a broker-data match provides no regulatory endorsement and is not relevant evidence that the healthcare provider is licensed. Identity and governance details should therefore be regarded as unclear pending independent confirmation.

EVIDENCE

- The treatment pages list services addressing skin, respiratory, endocrine, gynecological, kidney, cardiovascular, neurological, addiction, and other conditions.
- The site's legal and identity content, as supplied, contains no license number or named licensing authority.
- Hosting is identified as AS13335, Cloudflare, Inc. (CLOUDFLARENET).
- The site's TLS certificate is issued by WE1 at DV validation level and is valid until 2026-11-17.

What to Verify Next

An independent check should confirm the practitioner's qualifications and the clinic's registration with the relevant Indian professional or healthcare authority before any consultation, treatment purchase, or medical-data submission. The clinic's address and telephone details should be validated through an offline or independently sourced channel rather than relying solely on the website. Medical claims should be assessed against qualified clinical advice, and any payment process should use a protected method with clear refund and dispute mechanisms.

EVIDENCE

- The homepage and contact content publish the clinic location in Jaipur and a telephone contact for appointment-related services.
- The site presents treatment claims and patient resources but does not provide an independently verified registration reference.
- Browser analysis found no login form, sensitive form, wallet connection, or external password-submission destination.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears to serve a genuine healthcare-information and consultation purpose at the content level, but the external blacklist and malicious detections, combined with unverified operator identity, prevent a trustworthy legitimacy conclusion.

Infrastructure Integrity

Cloudflare CDN/WAF protection and edge-only address visibility provide a mitigating layer against direct exposure of the hosting origin, but protective delivery infrastructure does not validate the clinic’s identity, medical claims, or safety for sensitive use.

Closing Assessment

Pending independent practitioner, clinic, and payment-channel validation, interaction should remain limited to passive review; login, credential submission, medical-data sharing, and payment activity should not proceed through the site.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about homoeoclinic.co.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
