

Is honeybearchildcare.ca legit? TrustSniffer's high-trust assessment: 90/100

honeybearchildcare.ca

Verdict

90

OUT OF 100

HIGH TRUST

honeybearchildcare.ca appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-looking website for Honey Bear Child Care in Surrey, BC. Contains program descriptions, contact details, enrollment form, staff and philosophy information. Appears to be a local childcare centre site.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What honeybearchildcare.ca served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an informational local-business site for Honey Bear Child Care in Surrey, British Columbia, presenting preschool, daycare, and out-of-school care services, play-based learning, staff information, a calendar, gallery, contact details, and an enrollment pathway for families seeking childcare.

Scam/Impersonation Risk

No blacklist, phishing, impersonation, or conflicting-identity indicators were observed. The site presents a coherent childcare-service model rather than a deceptive payment or credential-collection scheme, and its single contact form does not request sensitive information or submit data to an untrusted destination. One external detection marked the domain as malicious, but this was a single unconfirmed signal and is not corroborated by the other supplied reputation checks, which found no broader malicious or blacklist finding. The observed behavioral anomalies—one suspicious inline script and substantial DOM changes after interaction—are technical irregularities without an associated phishing, cloaking, wallet, password-form, or data-exfiltration finding. Evidence:

- The homepage describes Honey Bear Childcare, play-based learning, and local childcare services; no impersonation or phishing indicator was identified.

- The contact page contains one contact form, with no sensitive fields and no untrusted submission destination.
- Domain registration records show registration on 2012-06-11, with an age of 14.2 years.
- Historical coverage records 97 archive snapshots spanning 2013–2026, across 14 years tracked, with no suspicious repurposing or semantic drift identified.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate local childcare provider, but it does not independently verify the real-world operator identity. The site states that staff are licensed Early Childhood Educators and have current first-aid, CPR, criminal-record, and background checks; these are on-site representations rather than independently confirmed credentials. No childcare license number or licensing authority is identified in the supplied page findings, leaving a regulatory-disclosure point for confirmation rather than evidence of a scam. A separate broker-reputation dataset found no match, while the broader technical and content evidence supports the site's established presentation. Evidence:

- The homepage and staff information describe the childcare philosophy, programs, educator qualifications, and safeguarding checks.
- The supplied page analysis classifies the site as a local-business/informational childcare and early-education website with no identified content red flags.
- The site's transport encryption uses a DV certificate issued by WE1, valid through 2026-11-15.
- Hosting resolves through AS13335, CLOUDFLARENET — Cloudflare, Inc., US.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the centre's legal operating identity, childcare authorization, and the status of the qualifications represented on the staff information page through the relevant British Columbia registry or an offline contact route. Enrollment arrangements should also be checked against the centre's written fee, cancellation, refund, and child-safeguarding terms, with payment protection retained for any tuition or enrollment transaction. Evidence:

- The homepage provides the stated Surrey, British Columbia location and telephone contact details for independent confirmation.
- The programs and enrollment pages identify the service categories and enrollment pathway to be checked against the written agreement.
- The contact page provides the centre's published communication route for confirming operational and payment details.

Summary Verdict

The overall posture is **high trust and low risk**, with no observed contradiction between the site's stated purpose, presentation, and available technical or external-reputation signals. Legitimacy appears well supported at the website level, while the connection to a specific real-world operator remains unverified.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, and all observed addresses are Cloudflare edge infrastructure rather than a directly exposed origin. This reduces direct origin exposure and is a mitigating technical control, but it is not proof of organizational legitimacy.

Closing Assessment

Ordinary browsing and service inquiry are proportionate; account or payment activity should proceed after the independent identity, authorization, contractual, and payment-protection checks described above.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of honeybearchildcare.ca.

- The request stayed on honeybearchildcare.ca. It was not redirected to another domain. CLEAR
- Registration is published under Netfirms, LTD. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-11. NOTED
- The earliest public archive of this site is from 2013-05-26. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about honeybearchildcare.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
