Full analysis

Overview

This is a corporate investor-relations website for HorizonOne Royalty Corporation, presenting a royalty-investment strategy in which capital is provided to operating businesses and investors are offered exposure through common shares and monthly dividend income.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there was no confirmed blacklist, phishing, impersonation, or conflicting legal identity signal. One external reputation check produced an isolated malicious classification, but it was unconfirmed and not accompanied by broader blacklist, search-warning, abuse-report, or impersonation findings; it therefore does not establish scam activity. The site's homepage and contact flow also show no login form, sensitive submission form, wallet interaction, cloaking, or hidden form behavior. The website's continuity and stable technical presentation are more consistent with an established corporate presence than with a disposable impersonation page, although the real-world operator identity remains unverified.

EVIDENCE

- The homepage presents a corporate identity and investment purpose, with no login form, hidden form, or sensitive data-collection form detected.
- External reputation checks recorded one isolated malicious result, while blacklist and search-warning indicators were false and abuse reporting showed 0 reports.
- The domain registration record shows creation on 2017-02-07 and an age of 9.53 years.
- Archive evidence records 38 snapshots spanning 2017–2026, with 10 years tracked.

Regulatory Verification Notes

The About Us and Investors sections describe a corporate royalty vehicle, its use of capital, common-share exposure, and dividend income. This is an investment-related proposition, but the supplied site content does not state a licensing authority or registration number; that is a regulatory-disclosure gap requiring confirmation rather than evidence of a scam. The registration record associates the domain with James Mahoney and HorizonOne Royalty Corporation, but the available evidence does not independently verify that connection to the operating legal entity. The overall presentation is professional and information-oriented, with no immediate solicitation of sensitive input.

EVIDENCE

- The About Us page identifies HorizonOne Royalty Corporation and describes long-term capital for business growth, recapitalizations, management buyouts, owner liquidity, and generational transitions.
- The Investors section presents common shares and monthly dividends but does not provide a stated license authority or license number.
- The domain registrar is easyDNS Technologies, Inc.; the registration record lists James Mahoney and HorizonOne Royalty Corporation.
- The site is hosted on AS400702 (AS-INVERDIGM - Inverdigm Inc., CA); its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-16.

What to Verify Next

Before any high-value investment or transfer, an independent corporate and securities-regulatory check should confirm the entity's standing, the applicable offering permissions, and the status of the proposed investment instrument. The investor materials should also be reviewed for dividend terms, valuation methodology, fees, risk disclosures, redemption or transfer restrictions, and audited financial information. Contact details and payment instructions should be confirmed through an independently sourced corporate channel rather than relying solely on information presented on the website.

EVIDENCE

- The Investors page is the relevant source for confirming the structure, terms, and risk disclosures of the proposed investment.
- The About Us page is the relevant source for comparing the stated business activities with independent corporate records.
- The Contact Us page should be cross-checked against independently sourced corporate information before sensitive or financial communication.

Summary Verdict

The site has a **moderate trust posture** and is assessed as not presenting a confirmed scam or impersonation pattern. Available evidence is consistent with an established, apparently legitimate corporate website, but the operator's real-world identity and investment-related standing are not independently verified, so legitimacy should be treated as apparent rather than proven.

Infrastructure Integrity

The site resolves to a single direct hosting address, 74.118.38.237, on AS400702 operated by AS-INVERDIGM - Inverdigm Inc., CA, with no CDN or WAF identified. This provides a clear hosting path but limited edge-layer protection; the infrastructure is a contextual technical factor, not proof of legitimacy.

Closing Assessment

Ordinary review may proceed, but sensitive or high-value engagement should follow independent entity, offering, contact-channel, and transaction-safeguard checks before funds or confidential information are committed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about horizononeroyalty.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
