Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate web presence of an Italian telecommunications provider presenting connectivity, networking, monitoring, DDoS protection, customer support, and wholesale services, while announcing Horizon Telecom's incorporation into air2bite S.r.l. and continuity of service for existing customers.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The merger announcement provides a coherent corporate purpose, identifies the acquiring entity, explains data-controller continuity under GDPR, and presents ordinary business-service mechanics rather than deceptive financial or credential-harvesting activity. External reputation checks were broadly clean; an isolated suspicious classification was not corroborated by malicious, phishing, or blacklist evidence.

- The corporate merger page identifies air2Bite S.r.l. as the acquiring entity and explains continuity for Horizon Telecom customers.
- The page contains a standard contact form with no password or sensitive credential fields.
- The domain was registered on 2013-01-03 and is approximately 13.58 years old.
- Historical records contain 100 snapshots spanning 2013-06-30 to 2026-07-04, covering 14 tracked years.

Regulatory Verification Notes

The site provides a credible corporate identity narrative and describes services for businesses, public entities, and wholesale customers. It references GDPR privacy responsibilities and service continuity following the acquisition. The supplied page does not present a specific telecom license or registration number, so any authorization requirements applicable to a prospective commercial arrangement should be confirmed independently. The absence of a broker-dataset match is a soft reputationally positive signal, not a regulatory determination.

- The merger page names air2Bite S.r.l. and states that it became the data controller for transferred customer information.
- The site is served from AS31034, ARUBA-ASN – Aruba S.p.A., Italy.
- The TLS certificate is issued by YR2 at DV validation level and is valid to 2026-10-07.

What to Verify Next

For a regulated or wholesale engagement, confirm any applicable Italian telecommunications authorization directly with the relevant registry and validate commercial contacts through an independently sourced corporate channel. Standard account access and ordinary website interaction are appropriate within normal organizational controls.

- The page identifies businesses, public administration, and wholesale customers as intended audiences.
- The site presents connectivity, networking, monitoring, DDoS protection, and support as conventional service offerings.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate telecommunications presence. Its identity, business purpose, historical continuity, technical operation, and external reputation converge without observed contradiction.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Aruba S.p.A. and does not show a detected CDN or WAF edge layer. This is a neutral hosting characteristic; the identified provider and resolved service posture provide a coherent infrastructure basis for normal use.

Closing Assessment

Prospective users may proceed with normal interaction and standard account access where offered, applying ordinary procurement and compliance controls for any formal commercial engagement.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of horizontelecom.it.

- The request for horizontelecom.it ended on air2bite.com, a different domain. WATCH
- Registration is published under OVH. CLEAR
- DNS for this domain is served by ovh.net. NOTED
- The registration is paid up to 2027-01-03. NOTED

- The earliest public archive of this site is from 2013-06-30. [CLEAR](#)
- It is hosted on ARUBA-ASN, from a server in IT. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about horizontelecom.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
