

Is horosho.house legit? TrustSniffer's high-trust assessment: 100/100

horosho.house

Verdict

100

OUT OF 100

HIGH TRUST

horosho.house appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Commercial website for "ХорошоДома", a company offering turnkey timber-frame houses in Saint Petersburg with catalogs of house projects, contact phone/email, office address, guarantees and forms to request callbacks or catalogs.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://horosho.house/>

What horosho.house served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

A Russian-language commercial website for “ХорошоДома,” presenting turnkey timber-frame house projects in Saint Petersburg and the surrounding Leningrad region, with service information, project catalogues, customer testimonials, contact channels, and enquiry forms intended to generate construction consultations and sales leads.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious detection, or confirmed blacklist match. The homepage presents a coherent construction-business proposition, including house projects, construction stages, guarantees, testimonials, and callback or catalogue-request forms, with no login form, hidden sensitive form, or suspicious contact-channel anomaly. A low-confidence external reputation signal consists of abuse reports associated with shared hosting infrastructure rather than demonstrably with this website; it is therefore a contextual infrastructure signal, not evidence that the site itself is malicious. One isolated suspicious classification was also recorded without a corresponding malicious finding, so it does not alter the overall conclusion.

EVIDENCE

- Homepage content: red-flag count 0; brand-impersonation and phishing indicators are false.
- Homepage forms: 3 forms identified, comprising lead capture, callback request, and order enquiry functions; no sensitive form or untrusted destination was detected.
- Domain registration: created 2018-02-21 (~8.5 years old); the site's historical records contain 83 snapshots spanning 2018–2026 (9 years tracked).
- External reputation telemetry: 0 malicious detections, 1 suspicious classification, and 30 abuse reports associated with shared provider infrastructure at confidence score 2.

Regulatory Verification Notes

The site presents an apparent business identity through the “ХорошоДом” name and provides a telephone number, office address, operating hours, guarantees, and enquiry mechanisms. That presentation is consistent with a functioning small construction enterprise, but the real-world operator has not been independently connected to the website. No licensing authority or registration number is claimed in the supplied site content; for this type of construction service, that is a transparency and verification point rather than evidence of a scam. Transport security is present, although domain-validated TLS confirms control of the domain rather than the legal identity of the operator.

EVIDENCE

- Hosting telemetry: served from AS9123, TimeWeb-AS - JSC _TIMEWEB_, RU.
- TLS telemetry: certificate issued by YR2, validation level DV, valid to 2026-09-06T08:33:52+00:00.
- Homepage and contact content: publishes +7 (812) 913-47-47, Monday–Friday 09:00–18:00, an office address, guarantees, and callback/catalogue forms.
- Site identity content: identifies the business as “ХорошоДом” and describes turnkey timber-frame house construction in Saint Petersburg and the Leningrad region.

What to Verify Next

Before a contract or payment commitment, an independent check should connect the “ХорошоДом” trading identity to the contracting legal entity, confirm that the office and telephone details are independently reachable, and review the written scope, guarantees, cancellation terms, and payment schedule. Any construction, consumer-protection, or financing representations relevant to the proposed transaction should be checked with the applicable official registry or counterparty documentation. Payment should use a method providing appropriate dispute and recovery protections.

EVIDENCE

- Contact page: provides the stated telephone, office details, and business hours for independent confirmation.
- Project and service pages: describe construction stages, guarantees, technologies, and project delivery claims that should be matched to the proposed contract.
- Callback and order forms: indicate a lead-generation and sales process requiring confirmation of the contracting party before sensitive or financial interaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The site's operator identity remains independently unverified, so the trust conclusion applies to the observed website and its content rather than serving as proof of a particular real-world legal entity.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than through a detected CDN or WAF, with no edge-IP layer identified. Its hosting is provided by TimeWeb-AS - JSC _TIMEWEB_, RU on AS9123; this is a neutral infrastructure characteristic and should be treated as a limited mitigating or operational signal, not proof of legitimacy.

Closing Assessment

Routine browsing and initial enquiries are proportionate; credential or payment interaction should follow ordinary independent merchant-identity, contract, return or cancellation, and payment-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 30 reports on hosting IP 92.53.96.245 (JSC TIMEWEB, Content Delivery Network), 2% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of horosho.house.

- The request stayed on horosho.house. It was not redirected to another domain. CLEAR
- Registration is published under Regional Network Information Center, JSC dba RU-CENTER. CLEAR
- DNS for this domain is served by timeweb.ru, across 4 name servers. NOTED
- The registration is paid up to 2027-02-21. NOTED
- The earliest public archive of this site is from 2018-03-16. CLEAR
- It is hosted on TimeWeb-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about `horosho.house` at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
