Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Host-Telecom.com is a Czech corporate technology provider presenting data-center infrastructure, dedicated servers, colocation, cloud services, storage, hosting, domains, SSL certificates, and managed IT solutions for professional customers.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, historical presence, or external reputation signals. The homepage presents a coherent B2B infrastructure-services model, with no phishing indicators, brand impersonation, malicious detections, or deceptive financial propositions. The long-established domain and sustained archival presence further support continuity rather than opportunistic repurposing.

- The homepage identifies Host-Telecom.com as a professional data-center and hosting provider, with dedicated servers, colocation, cloud, storage, and managed services.
- The domain was registered in 2002 and is approximately 23.78 years old.
- Historical records contain 236 snapshots spanning 2003–2026, covering 24 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing indication.

Regulatory Verification Notes

The site presents company information, policies, contact channels, multilingual support, and a physical Czech address. Its services are commercial IT and infrastructure offerings rather than a stated regulated financial activity; no licensing claim or license number is presented, so any sector-specific authorization should be confirmed where relevant. The domain is registered through OnlineNIC, Inc., while the site's technical deployment uses established Czech hosting infrastructure and valid transport encryption.

- The site's legal, contact, documents, and policy pages provide company information and a physical Czech address.
- Domain registration lists OnlineNIC, Inc. as registrar, with creation on 2002-10-25 and expiration on 2027-10-25.
- Hosted on AS51248 (HOST-TELECOM - Host-Telecom.com s.r.o., CZ).
- TLS certificate issued by YR2 using DV validation, valid to 2026-09-30.

What to Verify Next

For procurement or regulated use, confirm the contracting entity, applicable service terms, and any licensing or registration requirements with the relevant Czech or sector-specific registry. Independently confirm billing, support, and escalation channels before entering a long-term commercial commitment.

- The site provides dedicated-server pricing, service descriptions, payment options, and customer-support channels on its service and contact pages.
- The homepage identifies the business category as professional data-center and infrastructure services.
- The site provides legal documents and policies for review before contracting.

Summary Verdict

Host-Telecom.com presents as a legitimate, established, and trustworthy corporate infrastructure provider. The available evidence is internally consistent, commercially coherent, and free of observed impersonation, phishing, or malicious-site indicators. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to one Czech origin address operated by HOST-TELECOM - Host-Telecom.com s.r.o. on AS51248, without a detected CDN or WAF layer. This is a straightforward hosting posture and does not itself introduce a trust concern.

Closing Assessment

Standard browsing, account access, and ordinary service engagement are appropriate, with contractual and sector-specific checks retained for formal procurement or regulated deployments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about host-telecom.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
