

Is hostak.ru legit? TrustSniffer's high-trust assessment: 90/100

hostak.ru

Verdict

90

OUT OF 100

HIGH TRUST

hostak.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Commercial Russian hosting provider 'Hostak' offering domain registration, shared/VPS/dedicated hosting, SSL and related services. Contact details, pricing, promotions and support information are present. Payment methods and billing flow described.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Hostak is a commercial Russian web-services provider offering domain registration, shared hosting, virtual and dedicated servers, SSL certificates, customer support, promotions, and subscription-based billing, with the apparent business model of selling infrastructure and related online services to website operators.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent hosting-provider model, and the available reputation checks found no malicious detections, phishing indicators, impersonation signals, or confirmed blacklist activity. Its established web presence, sustained archival continuity, and top-tier global traffic footprint are consistent with an operating commercial service rather than a disposable or deceptive storefront. The observed browsing behavior was also benign: no hidden forms, password-exfiltration destinations, wallet-drainer activity, cloaking, or clipboard manipulation was detected.

EVIDENCE

- The homepage identifies Hostak as a provider of domains, hosting, virtual and dedicated servers, SSL, support, pricing, and promotions.
- Behavioral testing recorded two successful runs with zero hidden forms, zero external password forms, zero wallet-provider or wallet-drainer activity, and no cloaking.
- The domain was registered in 2005 and is approximately 21.06 years old.
- The web archive contains 266 snapshots spanning 2012-05-10 through 2026-06-07, covering 15 tracked years.

Regulatory Verification Notes

The site appears to operate as a conventional hosting and domain-registration merchant, not as a financial or investment service. The available material includes commercial contact, pricing, support, payment, and billing information, but does not state a license or registration number; this is a disclosure item to verify where a particular service or jurisdiction requires one, rather than evidence of a scam. The real-world operator identity is not independently verified, so the on-site commercial identity should be treated as apparent rather than proven. No matching third-party broker-reputation record was identified.

EVIDENCE

- The homepage provides a sales telephone number, a technical-support contact, service pricing, promotional terms, and customer billing information.
- Domain registration is recorded through RU-CENTER-RU, with creation on 2005-07-26 and expiry on 2027-07-26.
- The site's TLS certificate is issued by YR2, uses DV validation, and is valid through 2026-11-05.

What to Verify Next

Before credential or payment interactions, an independent check should connect the trading name to the relevant legal entity and confirm that the applicable service terms, cancellation or refund conditions, and payment-protection arrangements are acceptable. Where a regulated service is being purchased or a jurisdiction imposes registration requirements, the applicable registry should be checked directly. Account access should be initiated only through the independently confirmed official domain and contact channels.

EVIDENCE

- The homepage publishes service plans and payment or billing flows that can be compared against the final order and contractual terms.
- The site publishes support and sales channels that provide a basis for independent confirmation of merchant identity.
- The absence of a stated license or registration number should be resolved directly with the provider or relevant registry when such disclosure is applicable.

Summary Verdict

The overall posture is **high trust and low risk**. Available evidence is consistent with an established, apparently legitimate website, while the real-world operator identity remains independently unverified. No scam, phishing, impersonation, or other contradictory signal was observed.

Infrastructure Integrity

The site resolves to one apparent origin address hosted by DINET-AS—LLC Digital Network in Russia, AS12695, with no detected CDN or WAF layer. This provides a straightforward and identifiable hosting path but less edge-layer shielding than a CDN-backed deployment; it is a contextual infrastructure characteristic, not an indication of maliciousness.

Closing Assessment

Ordinary use is reasonable, subject to the independent merchant-identity, contractual, and payment-protection checks appropriate before submitting credentials or completing a payment.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostak.ru.

- The request stayed on hostak.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by 83.11, across 2 name servers. NOTED
- The registration is paid up to 2027-07-26. NOTED
- The earliest public archive of this site is from 2012-05-10. CLEAR
- It is hosted on DINET-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostak.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
