

Is hostengines.ng legit? TrustSniffer's high-trust assessment: 93/100

hostengines.ng

Verdict

93

OUT OF 100

HIGH TRUST

hostengines.ng appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Commercial hosting provider site (HostEgnines) advertising shared, VPS, cloud, email and dedicated hosting, domain services, and support with listed pricing and contact details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

HostEngines.ng is a commercial web-hosting platform presenting shared, VPS, cloud, email, Windows VPS, and dedicated-server services, together with domain registration, SSL, security, support, and subscription pricing for businesses seeking to deploy websites, applications, and online services.

Scam/Impersonation Risk

No contradictions were observed. The supplied evidence identifies no phishing, brand-impersonation, malicious-content, or confirmed blacklist indicators, and the site's presentation is consistent with an ordinary hosting-services business rather than a deceptive investment, gambling, or cryptocurrency operation. The apparent legitimacy is strong, although the real-world operator remains independently unverified; accordingly, the assessment supports an apparently legitimate site rather than proving the operator's identity.

EVIDENCE

- Homepage analysis: no brand-impersonation, phishing, hidden-form, wallet-drainer, clipboard-hijacking, or cloaking indicators were detected.
- External reputation evaluation: 0 malicious results and 0 suspicious results were recorded; no blacklist hit was recorded.
- Domain and archive telemetry: domain age recorded as 1.6837782340862424 years; 9 archive snapshots spanning 2024–2025, with 2 years tracked.

Regulatory Verification Notes

The homepage presents a conventional commercial model based on recurring hosting subscriptions and related domain and security services. It advertises shared and VPS hosting from ₦2,000 per month, cloud hosting from ₦5,000 per month, email hosting from ₦2,130 per mailbox per month, dedicated hosting from ₦6,000 per month, a 99% uptime guarantee, free SSL, and a 45-day money-back guarantee. The supplied About and homepage content uses general descriptions such as “leading hosting company” and “#1 Web Hosting Company”; it does not provide a clearly identified legal contracting entity, license, or registration number. For a hosting provider, this is a transparency and merchant-verification point rather than evidence of scam activity. The available evidence is otherwise consistent with an established commercial website, while independent operator verification remains incomplete.

EVIDENCE

- Homepage: lists shared, VPS, cloud, email, Windows VPS, and dedicated-server hosting, plus domain registration, SSL, support, and subscription pricing.
- Homepage: displays the claims “#1 Web Hosting Company,” “99% Uptime Guarantee,” “45-Day Money-Back Guarantee,” and “Free SSL Certificate Included.”
- Hosting infrastructure: served from AS22611, INMOTION - InMotion Hosting, Inc., US.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-18T12:12:46+00:00.

What to Verify Next

Before credential or payment interaction, the prospective customer should independently confirm the legal contracting entity, obtain the applicable service and refund terms, and check that the payment method provides appropriate dispute and recovery protections. Support and contact details should be validated through an independently sourced channel rather than relying solely on information presented within the site.

EVIDENCE

- About Us and Contact Us pathways: provide the site’s primary business-description and support-contact routes for independent comparison with external business records.
- Commercial onboarding: the site offers subscription services, making independent confirmation of the contracting party and payment protections the relevant next verification steps.

Summary Verdict

Available evidence supports a high-trust, low-risk posture for an apparently legitimate commercial website. The site’s business presentation, technical stability, clean reputation findings, and absence of contradictory signals are mutually consistent, but the operator’s real-world identity is not independently verified.

Infrastructure Integrity

The site is hosted directly through InMotion Hosting in the United States, with one resolved address and no detected CDN or WAF layer. Direct hosting is not inherently adverse; the valid transport certificate provides a mitigating control for connection security, while the infrastructure itself should not be treated as proof of business legitimacy.

EVIDENCE

- Infrastructure resolution: 1 unique IP address, 0 edge IPs, and 1 likely origin IP were recorded.
- Hosting provider: InMotion Hosting, Inc., United States, on AS22611.

Closing Assessment

Standard account use may be considered proportionate to the assessment, subject to ordinary independent merchant-identity, service-terms, and payment-protection checks before credentials or funds are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostengines.ng.

- The request stayed on hostengines.ng. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2024-12-03. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostengines.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
