Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Hostiman.ru is a Russian-language commercial hosting provider offering shared hosting, VPS/VDS, dedicated servers, domain registration, backups, SSL certificates, and technical support through recurring subscriptions and related service fees.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious reputation, or conflicting legal-identity signal. The homepage presents a coherent hosting business model, with stated offerings such as hosting from 180 rubles for 100 GB, VPS/VDS services, dedicated servers, domain services, DDoS protection, and 24/7 administrator support. Marketing claims—including “50+ servers in 10 countries,” “241,761” clients, and “Best VDS according to TestVPS.ru”—are self-presented commercial claims rather than independent proof of identity, but they are consistent with the site's stated business model. The login and registration functionality is expected for a hosting provider; testing found no hidden forms, password forms sent to external destinations, wallet activity, or cloaking. The site therefore reads as an established, apparently legitimate service rather than an impersonation or scam operation.

EVIDENCE

- The homepage identifies HostiMan as a hosting provider and presents hosting, VPS/VDS, server, domain, backup, SSL, pricing, and support services.
- The domain was registered on 2014-07-07 and is 12.11 years old; registrar: REGRU-RU.
- External reputation checks recorded 0 malicious and 0 suspicious results, with no blacklist finding; the site had traffic rank 21013 and was within the top 1,000,000 sites.
- The homepage contained login and registration forms, while behavioral testing recorded 0 hidden forms, 0 external password forms, 0 wallet-provider detections, and 0 wallet-drainer runs.

Regulatory Verification Notes

The site's content supports an established commercial hosting operation and states that services are available to individuals and legal entities with documentation for accounting purposes. However, the real-world operator identity is not independently verified by the available evidence, and no licensing or registration number for a regulated activity is established on the supplied pages. This is a verification and disclosure matter, not evidence of scam activity; hosting services of this type do not inherently require the kind of financial-services licensing applicable to brokerage or investment platforms. The overall legitimacy assessment is grounded by the site's

substantive product and support content, long-running domain registration, clean external reputation, established traffic footprint, valid TLS, and identifiable hosting infrastructure.

EVIDENCE

- The homepage provides pricing, service specifications, support details, and account functions for a commercial hosting business.
- The site's hosting infrastructure is identified as AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.
- TLS is confirmed as valid, issued by YR1 at DV validation level, with validity through 2026-09-14.
- The site's page-authority signal is in the mid range and is used only as contextual support, not as a licensing or regulatory determination.

What to Verify Next

Before credential or payment interactions, an independent counterparty check remains appropriate because the operator identity is not independently verified. The relevant checks should be proportionate to the intended commitment and should rely on information obtained outside the site's own marketing claims.

EVIDENCE

- Confirm the legal counterparty, billing entity, and applicable cancellation or refund terms through the site's account, terms, or billing documentation.
- Confirm any applicable business registration or service-specific obligations with the relevant official registry.
- Validate the published support and contact channels through an independent route before submitting sensitive account or payment information.
- For material prepaid commitments, use payment methods that provide appropriate transaction records and dispute protections.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification supports normal service interaction, while the absence of independent operator verification means that site legitimacy should not be treated as proof of a specific real-world entity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigation against direct exposure and abusive traffic, while the observed addresses were CDN edge infrastructure rather than an identified origin. This is a positive defensive characteristic, but it is not independent proof of the operator's legitimacy.

Closing Assessment

Ordinary independent merchant-identity, terms, and payment-protection checks should be completed before credentials or payment details are submitted, particularly for substantial or recurring commitments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostiman.ru.

- The request stayed on hostiman.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by com., across 2 name servers. NOTED
- The registration is paid up to 2027-07-07. NOTED
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostiman.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
