Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Hosting Capital is a Chilean web-hosting provider presenting annual hosting, domain, email, server, reseller, and web-design services, with the apparent purpose of supplying business and professional internet infrastructure.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The site's substantive hosting-service presentation includes cPanel, RAID storage, weekly backups, anti-spam controls, a 99.9% uptime claim, WordPress compatibility, annual domain pricing, and a notice that shared hosting ended on November 30, 2023, with migration support and prorated refunds for eligible customers. These are coherent with a conventional hosting business, and the available external reputation checks were clean. The site therefore presents no evidence of scam or impersonation risk.

- The homepage presents Hosting Capital as a professional hosting and email-services provider with detailed plans and technical features.
- The service notice explains the end of shared hosting on November 30, 2023, including migration support and eligible prorated refunds.
- The domain was registered in 2015 and is approximately 11.58 years old.
- Historical coverage records 40 archive snapshots across 10 tracked years, from 2015 through 2024.

Regulatory Verification Notes

The business model is commercial web hosting rather than a regulated financial service, and no licensing claim or registration number is presented in the supplied site content. This is a limited disclosure point for corporate or procurement verification, not evidence of deception. The ownership record identifies Ovivo Capital Spa, and the domain is registered through NIC Chile. A clean third-party reputational context and the site's established operational presentation support legitimacy, while page-authority signals are limited and do not independently establish trust.

- The homepage lists annual hosting, domain, email, VPS, dedicated-server, reseller, and web-design offerings with published specifications and prices.
- The domain registrar is NIC Chile; the recorded owner is Ovivo Capital Spa.
- Hosting is provided through AS32244, Liquid Web, L.L.C.
- The TLS certificate is DV, issued by YR2, and valid through 2026-10-30.

What to Verify Next

For enterprise onboarding or material commercial commitments, confirm the contracting entity and any applicable Chilean business or consumer-protection requirements through the relevant official registry, and

- validate the published support and migration channels through an independently sourced company contact.
- The homepage provides service descriptions, pricing, contact access, and customer-migration information.
 - The site identifies annual pricing and tax treatment, supporting a defined commercial transaction model.
 - The service-termination notice provides a specific operational date and refund approach for eligible customers.

Summary Verdict

Hosting Capital is an established, legitimate, and trustworthy website with a coherent commercial purpose and no observed contradiction or abuse signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to Liquid Web infrastructure in the United States, with no CDN detected and a likely origin-hosting configuration. This provides a clear hosting path and does not introduce a material trust concern; the infrastructure should be regarded as a mitigating technical signal rather than proof of legitimacy.

Closing Assessment

Standard use is appropriate, with ordinary commercial due diligence retained for organizational procurement, contractual commitments, and service-transition matters.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostingcapital.cl.

- The request stayed on hostingcapital.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 244.121), across 4 name servers. NOTED
- The registration is paid up to 2027-01-04. NOTED
- The earliest public archive of this site is from 2015-09-08. CLEAR
- It is hosted on LIQUIDWEB, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostingcapital.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
