Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

HostingPlus is a Chilean commercial web-hosting provider presenting shared hosting, VPS and dedicated servers, domain registration, SSL certificates, email, AI website-building, SEO, migration and support services through subscription and one-time fees. Its apparent business model is to provide managed hosting and related digital infrastructure to individuals and businesses.

Scam/Impersonation Risk

No contradictions were observed. The available evidence does not indicate phishing, brand impersonation, malicious content, or conflicting legal identities, and external reputation checks produced no malicious or suspicious detections. The site's stated commercial purpose is coherent with its hosting-service presentation, and its long-running domain registration and established customer-facing content are consistent with an apparently legitimate operating website. This supports normal low-risk browsing and ordinary service evaluation, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage identifies the service category as Chilean hosting and presents hosting, server, domain, SSL, email, AI website-builder and SEO offerings.
- The domain was registered on 2004-06-09 and is approximately 22.19 years old, with expiry recorded as 2031-07-07.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or phishing result.
- The homepage analysis found no login form, hidden form, wallet-connect behavior, or brand-impersonation indicator.

Regulatory Verification Notes

The site appears to operate as a commercial hosting provider rather than presenting itself as a regulated financial service. Its homepage provides pricing, service features, support claims, customer-service information and a company address, but the supplied evidence does not establish an independently verified corporate identity or regulatory registration. This is a verification and disclosure consideration rather than evidence of scam activity. No broker-data match was identified, although that contextual result is not a legal or licensing determination.

EVIDENCE

- The homepage describes paid hosting and associated infrastructure services monetized through annual plans and other service fees.
- The homepage states that the provider has operated since 2004 and serves more than 30,000 Chilean businesses.
- The site's transport encryption uses a DV certificate issued by YE1, valid through 2026-09-17.
- The site's hosting infrastructure is identified as AS396982, operated by GOOGLE-CLOUD-PLATFORM / Google LLC in the United States.

What to Verify Next

Before credential submission or payment, an organisation should independently confirm the provider's legal identity, applicable Chilean business details, service terms, cancellation and refund conditions, and the payment protections available for the selected plan. The stated customer-support channels and company address should be validated through an independent route, and any representation of Google Cloud partnership or Tier III data-centre capability should be confirmed if material to procurement. For enterprise use, contractual service levels, data-location terms, backup responsibility and abuse-response procedures should also be obtained in writing.

EVIDENCE

- The homepage publishes a central telephone number, customer-login entry point, support availability and a physical company address.
- The homepage advertises a 30-day guarantee, free migration and annual pricing, creating specific commercial terms for independent confirmation.
- The homepage claims Tier III data-centre infrastructure and Google Cloud partnership, which are material operational claims for enterprise assessment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was identified, but the real-world operator remains independently unverified, so legitimacy should be understood as apparent rather than proven.

Infrastructure Integrity

The site resolves to a single identified Google Cloud hosting address, with no CDN detected and a likely origin address visible in the supplied infrastructure data. Google Cloud hosting and the associated trusted infrastructure posture provide a mitigating operational signal, but infrastructure alone is not proof of ownership or legitimacy.

Closing Assessment

Ordinary evaluation is proportionate, with independent merchant-identity, contractual, return or refund, and payment-protection checks completed before credentials or payment details are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostingplus.cl.

- The request stayed on hostingplus.cl. It was not redirected to another domain. CLEAR
- Registration is published under NIC Chile. CLEAR
- DNS for this domain is served by 57.160), across 3 name servers. NOTED
- The registration is paid up to 2031-07-07. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostingplus.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
