

Is hostingraja.in legit? TrustSniffer's high-trust assessment: 90/100

hostingraja.in

Verdict

90

OUT OF 100

HIGH TRUST

hostingraja.in appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Commercial hosting provider site (HostingRaja) with cookie consent, analytics, live chat and Stripe checkout. Standard e-commerce flows and tracking; no explicit phishing or crypto investment claims present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

What appears to be an established commercial web-hosting provider, HostingRaja presents hosting products and pricing, customer support through live chat, cookie preferences, and a Stripe-enabled checkout for subscription and related service purchases.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there is no phishing, impersonation, malicious reputation, or conflicting legal-identity signal. The homepage presents a conventional hosting-service business rather than an investment, cryptocurrency, or other abuse-prone proposition, and its “India’s No.1 Hosting Provider” marketing claim is not accompanied by a detected impersonation indicator. The site’s apparent operator identity is **not independently verified**, so legitimacy is best described as apparent and evidence-consistent rather than proven.

EVIDENCE

- The homepage is classified as an e-commerce hosting-service page, with no detected phishing, brand-impersonation, or red-flag content.
- External reputation checks recorded zero malicious and zero suspicious detections, no blacklist result, and zero abuse reports; the associated infrastructure was marked as a content delivery network.
- The domain was registered in 2011 and is approximately 15.22 years old.
- Historical records show 1,058 archive snapshots spanning 2011–2026, covering 16 tracked years.

Regulatory Verification Notes

The site’s business model is ordinary commercial hosting: it sells hosting and related services, supports subscription payments through Stripe, and uses cookie consent, analytics, marketing integrations, and live chat. No regulated financial-service claim is present, and the available evidence does not establish a regulatory licensing requirement for the described hosting activity. The site does not claim a regulatory licence or display a licence number, which is a limited disclosure point rather than evidence of deception. Available evidence remains consistent with an established commercial website, while the real-world operator connection remains likely rather than independently verified.

EVIDENCE

- The homepage identifies the service category as web hosting and presents product, pricing, checkout, and customer-support functions.
- The site's registration record lists eNom, Inc. as registrar and WHG Hosting Services Ltd as the registrant organization.
- The hosting infrastructure is served from AS13335, Cloudflare, Inc.; the TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-03.
- No match was found in the reviewed broker-reputation dataset.

What to Verify Next

Before credential or payment interactions, an interested party should independently confirm the merchant identity shown in the purchase documentation, review the applicable service terms, renewal conditions, cancellation and refund provisions, and ensure that payment protections are available through the selected method. Contact and support channels should be confirmed through an independent, offline route before resolving account or billing disputes.

EVIDENCE

- The homepage includes a checkout-payment form and subscription-oriented purchase flow.
- The page exposes customer-support functionality through live chat and a contact form.
- The site links to Stripe for payment processing and presents cookie and privacy-consent controls.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk commercial website. Its long operating history, sustained historical presence, clean external reputation, and coherent hosting-service content support a high-trust posture, although the operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, with observed traffic terminating on Cloudflare edge infrastructure rather than directly exposing an origin server. This provides a meaningful mitigating control against routine network exposure, but it is infrastructure protection rather than proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate, with independent merchant-identity, terms, and payment-protection checks completed before credentials or funds are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

LIKELY

Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hostingraja.in.

- The request stayed on hostingraja.in. It was not redirected to another domain. CLEAR
- Registration is published under eNom, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-05-28. CLEAR
- The earliest public archive of this site is from 2011-07-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hostingraja.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
