- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

What is presented is a Spanish-language website for Hotel Andoria, a small accommodation business in San Salvador offering 16 rooms, lodging amenities, breakfast, parking, conference-room rental, and direct reservation contact channels.

Scam/Impersonation Risk

No contradictions were observed. The site presents a consistent local-hospitality purpose, and the supplied page and behavioral evidence show no phishing form, brand-impersonation signal, hidden sensitive form, wallet activity, clipboard manipulation, cloaking, or suspicious external posting behavior. The available reputation checks also contain no malicious or suspicious detections, although coverage was not complete; accordingly, the site is best described as apparently legitimate rather than as having a proven real-world operator identity.

EVIDENCE

- The homepage identifies a San Salvador hotel business and provides accommodation, amenity, location, and reservation-oriented content without login or password-capture functionality.
- Behavioral testing recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, 0 wallet-provider detections, and no cloaking.
- The domain was registered on 2014-10-22 and is listed as approximately 11.84 years old.
- Historical records contain 402 snapshots spanning 2012–2026, with 15 years tracked.

Regulatory Verification Notes

The available identity presentation is coherent with a local hotel, but the real-world operator is not independently verified by the supplied evidence. No license, registration number, or clearly identified legal operating entity is supplied in the reviewed content; for an accommodation business, this is a transparency and verification point rather than evidence of impersonation or fraud. No matching adverse third-party broker record was identified. The domain is registered through Launchpad.com Inc., and its transport security uses a known Sectigo DV certificate, supporting an established technical presentation but not independently proving ownership or regulatory status.

EVIDENCE

- The homepage and contact-oriented content provide a named hotel identity, physical location, telephone channels, and reservation contact details.
- Domain registrar: Launchpad.com Inc.; registered 2014-10-22; expiration date 2029-10-22.
- Hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- TLS certificate issued by Sectigo Public Server Authentication CA DV R36, validation level DV, valid to 2026-10-03.

What to Verify Next

Before credential or payment interaction, independently confirm the hotel's legal operating identity and any applicable Salvadoran tourism or business registration. The reservation process should also be checked for cancellation, refund, booking-confirmation, and payment-protection terms, with contact channels validated through an independent listing or offline route rather than relying solely on the website.

EVIDENCE

- The homepage contains reservation prompts and direct customer-contact options, making booking-policy confirmation the relevant next control.
- The site's identity and location pages provide the information needed for an independent merchant-identity comparison.
- The supplied content does not identify a license or registration number, so registry confirmation remains appropriate.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website serving a conventional hospitality business. The high-trust posture is supported by convergence across sustained domain and archival continuity, coherent page content, stable behavior, valid transport security, and clean available threat indicators, while operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by Namecheap in the United States, with no CDN edge or WAF layer identified. This is a straightforward hosting posture and does not itself indicate malicious activity; it simply provides less edge-layer separation than a site using dedicated CDN/WAF infrastructure.

Closing Assessment

Ordinary browsing is proportionate, while independent merchant-identity, booking-policy, and payment-protection checks should be completed before submitting credentials or payment information.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of hotelandoria.com.

- The request stayed on hotelandoria.com. It was not redirected to another domain. CLEAR
- Registration is published under Launchpad.com Inc.. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2029-10-22. CLEAR
- The earliest public archive of this site is from 2012-02-13. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about hotelandoria.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
